

System (ICIS–NPDES) database, implementation of the Electronic Reporting Rule Phase 1, and refined estimates. Other significant changes in estimates of burden hours are the result of the following adjustments:

- This ICR eliminates the initial permit application and compliance activities for existing Cooling Water Intake Structure (CWIS) facilities as these activities have been completed by all existing CWIS facilities, resulting in a decrease in estimated burden hours for CWIS facilities.

- The collection burden associated with compliance with and administration of small vessels general permit (sVGP) has been removed. Eliminating the sVGP also decreased the number of vessel respondents significantly.

- The estimated number of respondents in some of the categories (shown in Appendix D of the ICR Supporting Statement) both increased and decreased per the current NPDES Integrated Compliance Information System (ICIS–NPDES) database and based on refined EPA estimates.

- This ICR accounts for adjustments to inflation to September 2021 dollars that updated the presumed capital and O&M cost burden.

- The burden associated with Electronic Reporting Rule Phase I implementation activities has been removed. This includes the burden associated with Discharge Monitoring Report (DMR) mailing by permittees, and all state and federal DMR processing previously included in the ICR.
