SUPPLEMENTARY INFORMATION:

I. Background

The SIP is a living document revised by the state to address its unique and changing air pollution problems. As such, the state submits SIP revisions to the EPA and the EPA acts on those revisions and incorporates new and revised State regulations by reference into the Code of Federal Regulations (CFR).

On May 22, 1997, the EPA and the Office of the Federal Register (OFR) streamlined the incorporation by reference (IBR) procedures for SIPs (62 FR 27968). For a detailed description of the revised IBR procedures, please see the May 22, 1997 publication (62 FR 27968).

On March 20, 2013, the EPA published a **Federal Register** beginning the new IBR procedure for Washington (78 FR 17108). The EPA subsequently published updates to the IBR material for Washington on December 8, 2014 (79 FR 72548), April 12, 2016 (70 FR 21470), and February 8, 2019 (84 FR 2738).

II. EPA Action

In this action, the EPA is updating the regulatory materials incorporated by

reference into the Washington SIP at 40 CFR 52.2470(c) and (d) as of May 31, 2021. The EPA has determined that this rule falls under the “good cause” exemption in section 553(b)(3)(B) of the Administrative Procedures Act (APA) which, upon finding “good cause,” authorizes agencies to dispense with public participation and section 553(d)(3) which allows an agency to make a rule effective immediately (thereby avoiding the 30-day delayed effective date otherwise provided for in the APA). This rule simply codifies provisions which are already in effect as a matter of law in Federal and approved State programs. Under section 553 of the APA, an agency may find good cause where procedures are “impractical, unnecessary, or contrary to the public interest.” Public comment is “unnecessary” and “contrary to the public interest” since the codification only reflects existing law. Immediate notice in the CFR benefits the public by removing outdated citations and incorrect table entries.

III. Incorporation by Reference

In this document, EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, EPA is finalizing the incorporation by reference of Washington State provisions and source-specific requirements as set forth in the amendments to § 52.2470 as set forth below. EPA has made, and will continue to make, these materials generally available through www.regulations.gov and at the EPA Region 10 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

IV. Statutory and Executive Order Reviews

Under the Clean Air Act (CAA), the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA’s role is to approve State choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves State law as meeting Federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this action:

- Is not a “significant regulatory action” subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);

- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide the EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

The SIP is not approved to apply on any Indian reservation land in Washington except as specifically noted below and is also not approved to apply in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). Washington's SIP is approved to apply on non-trust land within the exterior boundaries of the Puyallup Indian Reservation, also known as the 1873 Survey Area. Under the Puyallup Tribe of Indians Settlement Act of 1989, 25 U.S.C. 1773, Congress explicitly provided state and local agencies in Washington authority over activities on non-trust lands within the 1873 Survey Area.

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

The EPA has also determined that the provisions of section 307(b)(1) of the CAA pertaining to petitions for judicial review are not applicable to this action. Prior EPA rulemaking actions for each individual component of the Washington SIP compilations had previously afforded interested parties the opportunity to file a petition for judicial review in the United States Court of Appeals for the appropriate circuit within 60 days of such rulemaking action. Thus, the EPA sees no need in this action to reopen the 60-day period for filing such petitions for judicial review for this “Identification of plan” update action for Washington.

DEPARTMENT OF THE INTERIOR**Fish and Wildlife Service****50 CFR Part 17**[Docket No. FWS-R2-ES-2021-0012;
FF09E21000 FXES1111090000 212]**Endangered and Threatened Wildlife and Plants; 12-Month Determination on a Petition To Revise Critical Habitat for the Mount Graham Red Squirrel****AGENCY:** Fish and Wildlife Service, Interior.**ACTION:** 12-Month determination.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce a 12-month determination on a petition to revise critical habitat for the Mount Graham red squirrel (*Tamiasciurus hudsonicus grahamensis*) under the Endangered Species Act of 1973, as amended (Act). The petition requests that the Service expand the subspecies' critical habitat designation to include currently occupied mixed conifer habitat and all historically occupied habitat outside the current critical habitat designation. Our 12-month determination is that we intend to assess revisions to the subspecies' critical habitat after a species status assessment and revised recovery plan for the Mount Graham red squirrel are completed.

DATES: The determination announced in this document was made on August 3, 2021.

ADDRESSES: This determination is available on the internet at <http://www.regulations.gov> at Docket No. FWS-R2-ES-2021-0012. SUPPLEMENTARY INFORMATION:**Background**

Section 4(b)(3)(D)(ii) of the Act (16 U.S.C. 1531 *et seq.*) states that within 12 months after receiving a petition to revise a critical habitat designation that is found to present substantial information indicating that the requested revision may be warranted, the Secretary will determine how he or she intends to proceed with the requested revision, and will promptly publish notice of such intention in the **Federal Register**.

Previous Federal Actions

On June 3, 1987, we published in the **Federal Register** (52 FR 20994) a final rule listing the Mount Graham red squirrel (red squirrel) as an endangered subspecies of the red squirrel, or pine squirrel (*T. hudsonicus* species account: Steele 1998, p. 1), pursuant to the Act. We concluded that the Mount Graham red squirrel was endangered because its range and habitat had been reduced and its habitat was at risk due to a number of factors, including the proposed construction of an astrophysical observatory, occurrences of forest fires, proposed construction and improvement of roads, and recreational development at high elevations. The rule concluded that red squirrels might also suffer due to resource competition with the introduced Abert's, or tassel-eared, squirrel (*Sciurus aberti*).

On January 5, 1990, we published in the **Federal Register** (55 FR 425) a final rule designating approximately 769 hectares (ha) (1,900 acres (ac)) in three separate units as critical habitat for the Mount Graham red squirrel. Critical habitat encompasses the Mount Graham Red Squirrel Refugium, which resulted from a July 1988 biological opinion and subsequent Arizona-Idaho Conservation Act of 1988 (Pub. L. 100-696, November 18, 1988), on Hawk and Plain View peaks (about 688 ha (1,700 ac)), as well as areas outside the Refugium on Heliograph and Webb Peaks (about 81 ha (200 ac)). The main attribute of critical habitat at that time was existing dense stands of mature (about 300 years old) spruce-fir forest, which has since been damaged by drought, insects, wildfire, and associated wildfire-suppression activities.

On January 11, 2006, we initiated a 5-year review of the Mt. Graham red squirrel (71 FR 1765); that 5-year review was completed on January 15, 2008. On May 27, 2011, we announced the

availability of, and requested public comments on, a draft recovery plan, first revision, for the Mount Graham red squirrel (76 FR 30957).

Petition History

On December 14, 2017, we received a petition from the Center for Biological Diversity, Maricopa Audubon Society, and the Mount Graham Coalition requesting that critical habitat for the Mount Graham red squirrel be revised under the Act, on an emergency basis. The petition requests that the Service expand the subspecies' critical habitat designation to include currently occupied mixed conifer habitat and all historically occupied habitat outside the current critical habitat designation. In general, the petitioners recommend expanding the current designation of critical habitat to include mixed conifer and spruce-fir forest above 7,500 feet (ft) (2,286 meters (m)), including specific areas currently occupied by the Mount Graham red squirrel at Grant Hill, Riggs Lake, Turkey Flat, and Columbine. The petition clearly identified itself as such and included the requisite identification information for the petitioners, required at 50 CFR 424.14(c). Because the Act does not provide for petitions to revise critical habitat in an emergency, we considered it as a petition to revise critical habitat for the red squirrel.

We published our 90-day finding on the petition to revise critical habitat for the Mount Graham red squirrel on September 6, 2019 (84 FR 46927). We determined that the petition presented substantial scientific information indicating that revising critical habitat for the Mount Graham red squirrel under the Act may be warranted, thus initiating the review that led to this 12-month determination.

This 12-month determination addresses the petition's request to revise the Mount Graham red squirrel's currently designated critical habitat.

Species Information

Mount Graham red squirrels are found only in the high-elevation forests of the Pinaleño Mountains in the Safford Ranger District of the Coronado National Forest in southeastern Arizona. The subspecies inhabits upper elevation, mature to old-growth associations in mixed conifer and spruce-fir forests above approximately 7,500 ft (2,286 m).

Mount Graham red squirrels are highly territorial (C.C. Smith 1968, pp. 33-34) and create middens within their territory. The middens in each squirrel's territory consist of piles of cone scales in which squirrels cache live, unopened cones as a food source for over-wintering and during times of cone
