

be very welcome. As an example, longer gear marks near the buoy and gear marks distinguishing permitting states, specific Federal and state water markings, and gear identification tape throughout buoy lines were analyzed in the FEIS released on July 2, 2021, for northeast lobster and Jonah crab trap/pot fisheries. One Team member suggested restricting fishing rope diameter to no greater than 0.5 inch (1.27 cm) to distinguish it from offshore Canadian gear.

Information received through this scoping process will inform the development of alternative risk reduction measures for an environmental impact analysis. Only inputs and suggestions that are within the scope of the proposed actions will be considered when developing the alternatives for analysis in the EIS. This includes items related to reducing risk of mortality and serious injury of large whales due to entanglements in commercial U.S. fishing gear and improving gear marking to reduce uncertainty about where entanglements occur. The purpose is to develop measures to fulfill the requirements of Section 118 of the MMPA, which regulates the taking of marine mammals incidental to U.S. commercial fishing operations. NMFS implements additional endangered species conservation and recovery programs under the ESA and also affords marine mammals protections under multiple programs pursuant to the MMPA. Therefore, for the purposes of the scoping period for this proposed action, we are not requesting input related to other stressors, such as vessel strikes, anthropogenic noise, natural mortality, international entanglement risk, offshore wind development, or climate change.

To promote informed decision-making, input should be as specific as possible and should provide as much detail as necessary to allow a commenter's meaningful participation and fully inform NMFS of the commenter's position. Input should explain why the issues raised are important to the consideration of potential environmental impacts and alternatives to the proposed action, as well as economic and other impacts affecting the quality of the human environment.

It is important that reviewers provide their input at such times and in such a manner that they are useful to the agency's preparation of the EIS. Comments should be provided prior to the close of the scoping period and should clearly articulate the reviewer's concerns and contentions. Input

received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. Input submitted anonymously will be accepted and considered.

Annual Notice of Interest Rates for Variable-Rate Federal Student Loans Made Under the Federal Family Education Loan Program Prior to July 1, 2010

AGENCY: Federal Student Aid, Department of Education.

ACTION: Notice.

SUMMARY: The Chief Operating Officer for Federal Student Aid announces the interest rates for loans made under the Federal Family Education Loan (FFEL) Program, Assistance Listing Number 84.032, that have variable interest rates. The rates announced in this notice are in effect for the period July 1, 2021, through June 30, 2022.

SUPPLEMENTARY INFORMATION: Section 427A of the Higher Education Act of 1965, as amended (HEA) (20 U.S.C. 1077a), provides formulas for determining the interest rates charged to borrowers on loans made under the FFEL Program, including Federal

Subsidized and Unsubsidized Stafford Loans (Stafford Loans), Federal PLUS Loans (PLUS Loans), Federal Consolidation Loans (Consolidation Loans), and Federal Supplemental Loans for Students (SLS Loans). No new loans have been made under the FFEL Program since June 30, 2010.

The FFEL Program includes loans with variable interest rates that change each year and loans with fixed interest rates that remain the same for the life of the loan. For loans with a variable interest rate, the specific interest rate formula that applies to a particular loan depends on the date of the first disbursement of the loan or, in the case of a Consolidation Loan, the date the application for the loan was received. If a loan has a variable interest rate, a new rate is determined annually and is in effect during the period from July 1 of one year through June 30 of the following year.

This notice announces the interest rates for variable-rate FFEL Program loans that will be in effect during the period from July 1, 2021, through June 30, 2022. Interest rates for fixed-rate FFEL Program loans may be found in a **Federal Register** notice published on September 15, 2015 (80 FR 55342).

For the majority of variable-rate FFEL Program loans, the annual interest rate is equal to the lesser of—

- (1) The bond equivalent rate of the 91-day Treasury bills auctioned at the final auction held before June 1 of each year, plus a statutory add-on percentage; or
- (2) A statutorily established maximum interest rate.

The bond equivalent rate of the 91-day Treasury bills auctioned on May 24, 2021, is 0.015 percent, rounded to 0.02 percent.

For PLUS Loans first disbursed before July 1, 1998, and for all SLS Loans, the annual interest rate is equal to the lesser of—

- (1) The weekly average of the one-year constant maturity Treasury yield, as published by the Board of Governors of the Federal Reserve System, for the last calendar week ending on or before June 26 of each year, plus a statutory add-on percentage; or
- (2) A statutorily established maximum interest rate.

The weekly average of the one-year constant maturity Treasury yield, as published by the Board of Governors of the Federal Reserve System, for the last calendar week ending on or before June 26, 2021, is 0.09 percent.

For Consolidation Loans that have a variable interest rate, the annual interest rate for the portion of a Consolidation Loan that repaid loans other than loans made under the Health Education
