

same manner to all TPHs. TPHs will have the discretion to submit complex orders with any ratio in the increments permitted by the proposed rule change. The proposed rule change will eliminate a current pricing disparity that exists between complex orders within the same class and thus provide the same pricing flexibility to all complex orders, regardless of their ratios. The Exchange does not believe the proposed rule change will impose any burden on intermarket competition, as it relates to the representation and execution of orders on the Exchange and will continue to protect Priority Customer Orders on the Simple Book. The Exchange believes the proposed rule change may promote competition, as market participants will have additional flexibility to execute their trading and hedging strategies in a more efficient manner and will permit all complex orders in the same class to trade in the same increments. Additionally, the Exchange understands from TPHs that another options market currently permits complex orders with ratios greater than three-to-one or less than one-to-three and their legs to execute in penny increments on its trading floor.²⁶
