POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Electronic data, records, and files are maintained in a stand-alone computer database hosted on FCC's computer network.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records are retrieved by an individual's name or Social Security Number (SSN).

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

The records in this information system are retained and disposed of in accordance with General Records Schedule (GRS) 5.6, items 180 and 181 (also referred to as DAA-GRS-2017-006-0024/0025), approved by the National Archives and Records Administration (NARA).

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

The electronic records, data, and files are stored within FCC accreditation boundaries and maintained in a database housed in the FCC computer network. Access to the electronic files is restricted to authorized SOC staff and contractors, and IT staff, contractors, and vendors who maintain the IT networks and services. As a further measure, access to these electronic records is restricted to the SOC staff and contractors who have a specific role in the system that requires their access to investigation information and related SOC functions. The SOC maintains an audit trail to monitor access. Furthermore, as part of these privacy and security requirements, SOC staff and contractors must complete training specific to their roles to ensure that they

are knowledgeable about how to protect PII. Other FCC employees and contractors may be granted access on a need-to-know basis. The electronic files and records are protected by the FCC and third-party privacy safeguards, a comprehensive and dynamic set of IT safety and security protocols and features that are designed to meet all Federal IT privacy standards, including those required by the Federal Information Security Modernization Act of 2014 (FISMA), the Office of Management and Budget (OMB), and National Institute of Standard and Technology (NIST).

Information Collections Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before November 8, 2021. If you anticipate that you will be submitting comments but find it difficult to do so within the period of

time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email to PRA@fcc.gov and to Cathy.Williams@fcc.gov.

Needs and Uses: The information collection requirements contained in Section 90.215 require station licensees to measure the carrier frequency, output power, and modulation of each transmitter authorized to operate with power in excess of two watts when the transmitter is initially installed and when any changes are made which would likely affect the modulation characteristics. Such measurements, which help ensure proper operation of transmitters, are to be made by a qualified engineering measurement service, and are required to be retained in the station records, along with the name and address of the engineering measurement service, and the name of the person making the measurements. The information is normally used by the licensee to ensure that equipment is operating within prescribed tolerances.
