### SUPPLEMENTARY INFORMATION:

#### I. Abstract

The National Aeronautics and Space Administration (NASA) Office of Diversity and Equal Opportunity and the Office of Procurement, in accordance with Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, and the Age Discrimination Act of 1975, requires grant awardees to submit an assurance of non-discrimination (NASA Form 1206) as part of their initial grant application package. The requirement for assurance of nondiscrimination compliance associated with federally assisted programs is long standing, derives from civil rights implementing regulations, and extends to the grant recipient's sub-grantees, contractors, successors, transferees, and assignees. Grant selectees are required to submit compliance information triennially when their award period exceeds 36 consecutive months. This information collection will also be used to enable NASA to conduct post-award civil rights compliance reviews.

**SUPPLEMENTARY INFORMATION:**

**I. Abstract**

The National Aeronautics and Space Administration (NASA) is leading an Urban Air Mobility (UAM) vehicle noise cooperative human response study involving multiple testing locations, other US government agencies, academia, and industry. Overarching study goals are:

1. Obtain a wide range of UAM vehicle sounds for use in human response studies.
2. Provide insights into human response of UAM vehicle noise that will collectively be challenging for any single agency or organization to acquire.
3. Create an open database of human response to UAM vehicle noise to support follow-on studies.

The UAM vehicle noise cooperative human response study is currently divided into two phases: A Feasibility Phase (Phase 1) and Phase 2. Each phase executes one or more psychoacoustic tests. Phase 1 seeks to demonstrate and refine the test methodology that will be used in Phase 2. Since UAM vehicle noise may be challenging to acquire as stimuli, the Phase 1 psychoacoustic test will use other types of aircraft noise as stimuli. Phase 2 will focus on capturing human response to UAM vehicle noise stimuli.

This information collection is for the Phase 1 psychoacoustic test. A remote psychoacoustic testing platform will allow recruited test subjects to listen to NASA-provided test sound stimuli over the internet using their own computers and headphones and register their annoyance rating for each.

The outcome of the Phase 1 psychoacoustic test is a demonstrated capability for ranking of sound stimuli by annoyance ratings from remote test subjects.

**II. Methods of Collection**

Test subjects will electronically indicate their annoyance rating to test stimuli into an interface displayed on their own computers.
