¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

² Notifications for food contact substance formulations and food contact articles. These notifications require the submission of Form FDA 3479 (“Notification for a Food Contact Substance Formulation”) only.

³ Duplicate notifications for uses of food contact substances.

⁴ Notifications for uses that are the subject of exemptions under 21 CFR 170.39 and very simple food additive petitions.

⁵ Notifications for uses that are the subject of moderately complex food additive petitions.

⁶ Notifications for uses that are the subject of very complex food additive petitions.

⁷ These notifications require the submission of Form FDA 3480.

⁸ These notifications recommend the submission of Form FDA 3480.

⁹ These notifications recommend the submission of Form FDA 3480A.

Based on a review of the information collection since our last request for OMB approval, we made adjustments to our burden estimate. The estimates are based on our current experience with the Food Contact Substance Notification Program and informal communication with industry.

Our estimated burden for the information collection reflects an overall increase of 1,345 hours and a corresponding decrease of 5 responses. We attribute this adjustment to a decrease in Pre-Notification Consultations or Master Files by 40 responses, a subsequent decrease of amendments to Pre-Notification Consultations or Master Files by 20 responses, and an increase of 55 respondents using the recommendations in the guidance document entitled, “Use of Recycled Plastics in Food Packaging: Chemistry Considerations.” As the average burden for preparing recycling submissions is higher than for Pre-notification Consultations or Master Files, this results in an overall increase in total burden even with an overall decrease in responses.

Acting Principal Associate Commissioner for Policy.
