SUPPLEMENTARY INFORMATION:

Title: Pale Cyst Nematode.

OMB Control Number: 0579–0322.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: The Plant Protection Act (7 U.S.C 7701 *et seq.*) authorizes the Secretary of Agriculture to restrict the importation, entry, or interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests into the United States or their dissemination within the United States.

In accordance with the regulations in “Subpart S-Pale Cyst Nematode” (7 CFR 301.86 through 301.86–9), the Animal and Plant Health Inspection Service of the U.S. Department of Agriculture restricts the interstate movement of certain articles to help prevent the spread of pale cyst nematode, a major pest of potato crops in cool-temperature areas, via potatoes, soil, and other host material to noninfested areas of the United States. The regulations involve information collection activities such as certificates, permits, appeals, compliance agreements, self-certifications, packing facility process approvals, and labeling.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 0.28 hours per response.

Respondents: U.S. potato producers, packers, processors, and handlers.

Estimated annual number of respondents: 212.

Estimated annual number of responses per respondent: 8.

Estimated annual number of responses: 1,747.

Estimated total annual burden on respondents: 484 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 14th day of September 2021.

Mark Davidson,

Acting Administrator, Animal and Plant Health Inspection Service.
