

Respondents: Business or other for-profit, not-for-profit institutions, and state, local and tribal government.

Number of Respondents and Responses: 1,670 respondents; 1,670 responses.

Estimated Time per Response: .5–10 hours.

Frequency of Response: On occasion reporting requirement; third party disclosure requirement; upon commencement of service, or within 3 years of effective date of rules; and at end of license term, or 2024 for incumbent licensees.

Obligation to Respond: Statutory authority for this collection are contained in sections 1, 2, 3, 4, 5, 7, 10, 201, 225, 227, 301, 302, 302a, 303, 304, 307, 309, 310, 316, 319, 332, and 336 of the Communications Act of 1934, 47 U.S.C. 151, 152, 153, 154, 155, 157, 160, 201, 225, 227, 301, 302, 302a, 303, 304, 307, 309, 310, 316, 319, 332, 336, Section 706 of the Telecommunications Act of 1996, as amended, 47 U.S.C. 1302.

Total Annual Burden: 790 hours.

Total Annual Cost: \$581,250.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Needs and Uses: On November 19, 2020, the Commission released a Report and Order, FCC 20–159, in IB Docket No. 18–314, titled, “Further Streamlining Part 25 Rules Governing Satellite Services.” In this Report and Order, among other rule changes, the Commission adopted an optional, extended build-out period for earth station licensees. The optional build-out period increases the allowable time for an earth station to be brought into operation from within one year after licensing, to within: Up to five years and six months for earth stations operating with geostationary satellites; or, up to six years and six months for earth stations operating with non-geostationary satellites. As a companion provision to this new build-out period option, the Commission adopted a requirement for earth station licensees subject to 47 CFR 25.136 to re-coordinate with licensees of Upper Microwave Flexible Use Service (UMFUS) stations if the earth station is brought into operation later than one year after the date of the license grant. The earth station licensee must complete re-coordination within one year before its commencement of operation. The re-coordination should account for any demographic or geographic changes as well as changes to the earth station equipment or

configuration. A re-coordination notice must also be filed with the Commission before commencement of earth station operations.

This information collection is used by UMFUS licensees to provide accurate information on the earth station operations notwithstanding the substantially longer earth station build-out period that was adopted. The collection also counterbalances the potential chilling of some UMFUS developments that might otherwise result from the extended earth station build-out periods, and thereby serves as an important check on potential warehousing. Without such information, the Commission would not be able to regulate the shared use of radiofrequencies among earth stations and UMFUS stations in the public interest, in accordance with the Communications Act of 1934, as amended.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 100217097–1757–02; RTID 0648–XB419]

Reef Fish Fishery of the Gulf of Mexico; 2021 Commercial and Recreational Closure of Silk Snapper, Queen Snapper, Blackfin Snapper, and Wenchman

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS implements an accountability measure (AM) applicable to all harvest of species in the mid-water snapper stock complex, consisting of silk snapper, queen snapper, blackfin snapper, and wenchman in the Gulf of Mexico (Gulf) exclusive economic zone (EEZ). NMFS determined that combined commercial and recreational landings of the species in the mid-water snapper complex in the 2021 fishing year have exceeded the annual catch limit (ACL). Therefore, NMFS closes the Gulf EEZ to all harvest of species in the mid-water snapper complex on September 18, 2021, for the remainder of the 2021

fishing year. This closure is necessary to protect the species in the mid-water snapper complex.

DATES: The closure is effective at 12:01 a.m., local time, September 18, 2021, until January 1, 2022.

FOR FURTHER INFORMATION CONTACT: Kelli O'Donnell, NMFS Southeast Regional Office, telephone: 727–824–5305, email: kelli.odonnell@noaa.gov.

SUPPLEMENTARY INFORMATION: NMFS manages the Gulf reef fish fishery, which includes the mid-water snapper complex (silk snapper, queen snapper, blackfin snapper, and wenchman) under the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico (FMP). The FMP was prepared by the Gulf of Mexico Fishery Management Council. The FMP is implemented by NMFS under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) by regulations at 50 CFR part 622. All weights described in this temporary rule apply as round weight.

The ACL for the mid-water snapper complex is 166,000 lb (75,296 kg) during the fishing year of January 1 through December 31. As specified in 50 CFR 622.41(i), if NMFS estimates that the sum of commercial and recreational landings (total landings) exceed the stock complex ACL, then during the following fishing year, if total landings again reach or are projected to reach the stock complex ACL, NMFS will close the commercial and recreational sectors for the remainder of that fishing year by filing a notification to that effect with the Office of the Federal Register.

In the 2020 fishing year, combined commercial and recreational landings of species in the mid-water snapper complex exceeded the stock ACL. As of September 7, 2021, available commercial and recreational landings data from the NMFS Southeast Fishery Science Center indicate that stock ACL for the mid-water snapper complex for the 2021 fishing year has been exceeded.

Accordingly, NMFS closes the Gulf EEZ to all harvest of species from the mid-water snapper complex from 12:01 a.m., local time, on September 18, 2021, through December 31, 2021, the end of the current fishing year. During the closure, the commercial sale or purchase of species from the mid-water snapper complex harvested from the Gulf EEZ is prohibited, and the recreational bag and possession limits are zero. Commercial and recreational harvest of species in the mid-water snapper complex will reopen on January 1, 2022.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR 622.41(i), which was issued pursuant to section 304(b) of the Magnuson-Stevens Act, and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment are unnecessary and contrary to the public interest. Such procedures are unnecessary because the rule implementing the stock complex ACL and the associated AM has already been subject to notice and public comment, and all that remains is to notify the public of the closure. Such procedures are also contrary to the public interest because of the need to immediately implement the closure to protect the mid-water snapper stock complex. The capacity of the fishing fleet allows for rapid harvest of the ACL and the ACL has already been met. Prior notice and opportunity for public comment would require time and could result in additional harvest.

For the aforementioned reasons, there is good cause to waive the 30-day delay in the effectiveness of this action under 5 U.S.C. 553(d)(3).

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 15, 2021.

Jennifer M. Wallace,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[Docket No. 180720681-8999-02; RTID 0648-XB426]

Snapper-Grouper Fishery of the South Atlantic; 2021 Recreational Accountability Measure and Closure for South Atlantic Golden Tilefish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS implements accountability measures (AMs) applicable to recreational harvest of golden tilefish in the exclusive economic zone (EEZ) of the South

Atlantic for the 2021 fishing year through this temporary rule. NMFS estimates that recreational landings of golden tilefish in 2021 have exceeded the recreational annual catch limit (ACL). Therefore, NMFS closes the golden tilefish recreational sector in the South Atlantic EEZ on September 20, 2021. This closure is necessary to protect the golden tilefish resource.

DATES: This rule is effective 12:01 a.m., local time, September 20, 2021, until 12:01 a.m., local time, January 1, 2022.

FOR FURTHER INFORMATION CONTACT: Mary Vara, NMFS Southeast Regional Office, telephone: 727-824-5305, email: mary.vara@noaa.gov.

SUPPLEMENTARY INFORMATION: The snapper-grouper fishery of the South Atlantic includes golden tilefish and is managed under the Fishery Management Plan for the Snapper-Grouper Fishery of the South Atlantic Region (FMP). The FMP was prepared by the South Atlantic Fishery Management Council and is implemented by NMFS under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) by regulations at 50 CFR part 622.

On January 4, 2019, NMFS implemented management measures for golden tilefish through a final rule for Amendment 28 to the Snapper-Grouper FMP (83 FR 233; December 4, 2018). That final rule set a recreational ACL of 2,316 fish (50 CFR 622.193(a)(2)(i)) and revised the recreational AM. The inseason recreational AM states that if recreational landings reach or are projected to reach the recreational ACL, then the recreational sector will be closed for the remainder of the fishing year (50 CFR 622.193(a)(2)(i)).

Landings data from the NMFS Southeast Fisheries Science Center indicate that the golden tilefish recreational ACL of 2,316 fish has been reached. Therefore, this temporary rule implements an AM to close the golden tilefish recreational sector of the snapper-grouper fishery for the remainder of the 2021 fishing year. As a result, the recreational sector for golden tilefish in the South Atlantic EEZ will be closed effective 12:01 a.m., local time September 20, 2021. The recreational sector for golden tilefish will open on January 1, 2022, the beginning of the 2022 fishing year and the recreational fishing season. During the closure, the bag and possession limits for golden tilefish in or from the South Atlantic EEZ are zero.

NMFS also closed the commercial sector for golden tilefish for the remainder of the 2021 fishing year (86

FR 29209; June 1, 2021). Therefore, as of the date of this recreational closure, all harvest and possession of golden tilefish in the South Atlantic EEZ is prohibited.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR 622.193(a)(2)(i), which was issued pursuant to section 304(b) of the Magnuson-Stevens Act, and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), the NMFS Assistant Administrator (AA) finds good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment are unnecessary and contrary to the public interest. Such procedures are unnecessary because the rule that established the recreational ACL and AM for golden tilefish has already been subject to notice and comment, and all that remains is to notify the public of the closure. Such procedures are contrary to the public interest because of the need to immediately implement this action to protect the golden tilefish stock. The recreational ACL has been reached and prior notice and opportunity for public comment would require time, potentially resulting in a harvest well in excess of the established ACL.

For the aforementioned reasons, the AA also finds good cause to waive the 30-day delay in the effectiveness of this action under 5 U.S.C. 553(d)(3).

Authority: 16 U.S.C. 1801 *et seq.*
