Title of Collection: Student Assistance General Provisions—Readmission for Servicemembers.

OMB Control Number: 1845-0095.

Type of Review: An extension without change of a currently approved collection.

Respondents/Affected Public: Individuals and Households; Private Sector; State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 4,570.

Total Estimated Number of Annual Burden Hours: 1,531.

Abstract: The Department of Education (the Department) is requesting an extension without change of the current record keeping information collection. Due to the effects of the COVID-19 pandemic the Department lacks sufficient data to allow for more accurate updates to the usage of the form. There has been no change in either the statute as provided by the Higher Education Act of 1965, as amended (HEA) or in the regulations. The regulations identify the requirements under which an institution must readmit servicemembers with the same academic status they held at the institution when they last attended (or were accepted for attendance). The regulations require institutions to charge readmitted servicemembers, for the first academic year of their return, the same institutional charges they were charged for the academic year during which they left the institution (see section 484C of the HEA).

k. *Description of Request:* The applicant requests Commission approval for a temporary variance from the reservoir elevation requirements at Lake Shafer which is part of the Norway Development. Due to the severe regional drought conditions and low river flow on the Tippecanoe River, the applicant is currently operating the project under abnormal river conditions and requests a variance from the allowable elevation at Lake Shafer (maintain fluctuation within of 0.25 feet below elevation 647.47 feet National Geodetic Vertical Datum) so that it can continue to meet the flow requirements from the downstream Lake Freeman (part of the Oakdale Development) to protect the federally endangered mussel species. Although the duration of drought conditions are difficult to predict, the applicant requests the temporary variance to remain into effect until March 31, 2022, which is when winter weather conditions typically begin to subside and will produce sufficient flow from melting snow and ice to allow Lake Shafer to return to its normal elevation.
