#### City of North Little Rock; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On June 28, 2021, the City of North Little Rock filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of the Toad Suck Ferry Lock & Dam Hydroelectric Project No. 15226-000 (Toad Suck Ferry Project, or project), a run-of-river project to be located at the existing U.S. Army Corps of Engineers' Toad Suck Ferry Lock and Dam in Faulkner County, Arkansas. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) An existing reservoir with a maximum water surface elevation of 265.3 feet mean sea level; (2) an existing, 1,450-foot-long lock and dam, including a 1,120-foot-long spillway section with 16, 60-foot-long by 27-foot-high tainter gates; (3) a new headrace intake channel; (4) a new concrete powerhouse housing one, 40-megawatt horizontal turbine-generator unit; (5) a new discharge penstock; (6) a new tailrace receiving flow from the penstock; (7) a new interconnection line to either the existing, 69 kilo-Volt (kV)

Bigelow substation, or the existing, 115-kV Mayflower substation; and (8) appurtenant facilities.

[Project No. 1061-103]

#### Pacific Gas and Electric Company; Notice of Intent To Prepare an Environmental Assessment

On August 24, 2020, Pacific Gas and Electric Company filed an application for a major, new license for the 1.6 megawatts Phoenix Hydroelectric Project (FERC No. 1061). The existing project is located on the South Fork Stanislaus River and in the Tuolumne River Basin, in Tuolumne County, California. The project occupies 26.99 acres of federal land administered by the U.S. Forest Service and 0.59 acres administered by the Bureau of Land Management.

In accordance with the Commission's regulations, on July 2, 2021, Commission staff issued a notice that

the project was ready for environmental analysis (REA Notice). Based on the information in the record, including comments filed on the REA Notice, staff does not anticipate that licensing the project would constitute a major federal action significantly affecting the quality of the human environment. Therefore, staff intends to prepare a draft and final Environmental Assessment (EA) on the application to relicense the Phoenix Project.

The EA will be issued and circulated for review by all interested parties. All comments filed on the EA will be analyzed by staff and considered in the Commission's final licensing decision.

The application will be processed according to the following schedule. Revisions to the schedule may be made as appropriate.

Milestone	Target date
Commission issues draft EA.	May 2022.
Comments on draft EA.	June 2022.
Commission issues final EA.	September 2022 <sup>1</sup> .
