

other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107-198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might “further reduce the information collection burden for small business concerns with fewer than 25 employees.”

OMB Control Number: 3060-XXXX.

Title: Private Entity Robocall and Spoofing Information Submission Portal, FCC Form 5642.

Form Number: FCC Form 5642.

Type of Review: New collection.

Respondents: Business or other for-profit entities, and non-profit organizations.

Number of Respondents and Responses: 50 respondents; 50 responses.

Estimated Time per Response: 1 hour.

Frequency of Response: On occasion reporting requirement; third party disclosure requirement.

Obligation to Respond: Voluntary. Statutory authority for this information collection is contained in the TRACED Act section 10(a).

Total Annual Burden: 50 hours.

Total Annual Cost: No Cost.

Needs and Uses: Section 10(a) of the Pallone-Thune Telephone Robocall Abuse Criminal Enforcement and Deterrence Act (TRACED Act) directs the Commission to establish regulations to create a process that “streamlines the ways in which a private entity may voluntarily share with the Commission information relating to” a call or text message that violates prohibitions

regarding robocalls or spoofing set forth section 227(b) and 227(e) of the Communications Act of 1934, as amended. On June 17, 2021, the Commission adopted a *Report and Order* to implement section 10(a) by creating an online portal located on the Commission’s website where private entities may submit information about robocall and spoofing violations. The Enforcement Bureau (Bureau) will manage this portal.

A private entity is any entity other than (1) an individual natural person or (2) a public entity. A public entity is any governmental organization at the federal, state, or local level. Thus, the portal is not intended for individual consumers who already have a mechanism to submit robocall or spoofing complaints via the Commission’s informal complaint process.

The portal will request private entities to submit certain minimum information including, but not necessarily limited to, the name of the reporting private entity, contact information, including at least one individual name and means of contacting the entity (e.g., a phone number), the caller ID information displayed, the phone number(s) called, the date(s) and time(s) of the relevant calls or texts, the name of the reporting private entity’s service provider, and a description of the problematic calls or texts. Although the portal will not reject submissions that fail to include the above information, such failure will make it more difficult for the Bureau to investigate fully and take appropriate

enforcement action. Once submitted, the Bureau will review to determine whether the information presents evidence of a violation of the Commission’s rules. The Bureau may share submitted information with the Department of Justice, Federal Trade Commission, other federal agencies combatting robocalls, state attorney general offices, other law enforcement entities with which the Commission has information sharing agreements, and the registered traceback consortium.
