TSA confirms the eligibility of the participant by contacting the participant’s employer, and confirms attendance by comparing the registration information against a sign-in sheet provided in the classroom. In addition, TSA asks each crew member to complete an Injury Waiver Form during the registration process, or before the training is conducted. Finally, TSA asks trainees to complete a voluntary evaluation of the training upon completion of the course.

The **Federal Register** notice that solicited public comment on the information collection for a period of 60 days was published on June 25, 2021 at 86 FR 33333.

A. Overview of Information Collection

Title of Information Collection: 24 CFR part 50—Protection and Enhancement of Environmental Quality.

OMB Approval Number: 2506–0177.

Type of Request: Revision of a currently approved collection.

Form Number: N/A.

Description of the need for the information and proposed use: HUD requests its applicants to supply environmental information that is not otherwise available to HUD staff for the environmental review on an applicant’s proposal for HUD financial assistance to develop or improve housing or community facilities. HUD itself must perform an environmental review for the purpose of compliance with its environmental regulations found at 24 CFR part 50, Protection and Enhancement of Environmental Quality. Part 50 implements the National Environmental Policy Act and implementing procedures of the Council on Environmental Quality, as well as the related federal environmental laws and executive orders. HUD’s agency-wide provisions—24 CFR 50.3(h)(1) and 50.32—regulate how individual HUD program staffs are to utilize such collected data when HUD itself prepares the environmental review and compliance. Separately, individual HUD programs each have their own regulations and guidance implementing environmental and related collection responsibilities. For the next three years, this approved collection will continue unchanged under this OMB control number to assure adequate coverage for all HUD programs subject to Part 50.

Abstract: The Service collects and maintains necessary geospatial data to meet our mission in accordance with the Federal Funding Accountability and Transparency Act of 2006, as amended (31 U.S.C. 6101); Geospatial Data Act of 2018 (43 U.S.C. chapter 46, 2801–2811); National Technology Transfer and

Advancement Act of 1995 (Pub. L. 104–113); Open, Public, Electronic, and Necessary (OPEN) Government Data Act; Title II of the Foundations for Evidence-Based Policymaking Act of 2018 (Pub. L. 115–435); OMB Circular A–16, “Coordination of Geographic Information and Related Spatial Data Activities”; OMB Circular A–119, “Federal Participation in the Development and Use of Voluntary Consensus Standards and in Conformity Assessment Activities”; and OMB Circular A–130, “Managing Information as a Strategic Resource.”

Geospatial data identifies and depicts geographic locations, boundaries, and characteristics of features on the surface of the earth. Geospatial data includes geographic coordinates (*e.g.*, latitude and longitude) to identify the location of earth’s features, and data associated to geographic locations (*e.g.*, land survey data and land cover type data). The Service’s organizational ArcGIS online program (AGOL), accessed at <http://fws.maps.arcgis.com>, is an easy place to share data with the public and partners, as well as internally among Service staff. It can also be used to build and deploy mobile-enabled online maps, applications, and services for geographic information systems (GIS) users and non-GIS users alike. Sensitive data is restricted from public access via an internal-facing intranet version of AGOL. Moreover, because the system contains only controlled unclassified information (CUI) that would be designated as low impact under the Federal Information Security Act (FISMA; 2002), no personally identifiable information (PII) is allowed within the system.

The AGOL platform enables the Service to effectively manage geospatial data resources and technology to successfully deliver geospatial services in support of the Service’s mission. Data collected through AGOL enables improved visualization, analysis, interoperability, modeling, sharing, and decision support. The benefits include increased accuracy, increased productivity, and more efficient information management and application support.

In addition to collecting name and contact information, additional comments about the submission, and photographs (optional), we collect the following types of data from our partners through AGOL to improve our online maps, web-mapping applications, and story maps (data collected is specific to a particular project; we will not collect all data types below with each submission):
