SUPPLEMENTARY INFORMATION:

Background

The GPRA Modernization Act of 2010 (Pub. L. 111-352), holds federal agencies accountable for using resources wisely and achieving program results. Specifically, the GPRA Modernization Act requires agencies to develop *Strategic Plans*, which include a mission statement, long-term goals, objectives, and strategies to achieve them over a four-year time horizon; and two-year Agency Priority Goals to drive significant progress toward Agency leadership priorities. The GPRA Modernization Act also requires agencies to develop *Annual Performance Plans*, which provide annual performance measures and activities toward the *Strategic Plan*, and *Annual Performance Reports*, which evaluate an agency's success in achieving the annual performance measures.

The Foundations for Evidence-Based Policymaking Act of 2018 (Pub. L. 115-435) amended GPRA and requires two additional components in the *Strategic Plan*: An evidence-building plan, known as a *Learning Agenda*, which identifies policy-relevant questions for which agencies intend to develop evidence; and a *Capacity Assessment*, which gauges agencies' capacity to support the development and use of evaluation and other evidence.

The *Strategic Plan* includes seven strategic goals focused on protecting human health and the environment and four cross-agency strategies that describe the essential ways EPA will work to carry out its mission. The *Strategic Plan* also establishes long-term performance goals and FY 2022-2023 Agency Priority Goals by which EPA will hold itself accountable to monitor progress in protecting human health and the environment in collaboration with EPA's partners and stakeholders.
