DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day-21-21IK; Docket No. CDC-2021-0107]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the

general public and other Federal agencies the opportunity to comment on a proposed and/or continuing information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled Study to Explore Early Development (SEED) Follow-up Studies. This follow-up study will allow CDC to better understand the developmental trajectory of children with autism spectrum disorder, their health outcomes and co-occurring conditions at older ages, and the associated early predictors of these outcomes, including intellectual abilities.

DATES: CDC must receive written comments on or before December 3, 2021.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2021–0107 by any of the following methods:

- *Federal eRulemaking Portal:* [Regulations.gov](https://www.regulations.gov). Follow the instructions for submitting comments.

- *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to [Regulations.gov](https://www.regulations.gov).

Please note: Submit all comments through the Federal eRulemaking portal ([regulations.gov](https://www.regulations.gov)) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329; phone: 404–639–7118; Email: omb@cdc.gov.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** (<https://www.federalregister.gov/>) concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To

comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected;
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses; and
5. Assess information collection costs.

Proposed Project

Study to Explore Early Development (SEED) Follow-up Studies—New—National Center on Birth Defects and Developmental Disabilities (NCBDDD), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

In 2016, an estimated one in 54 children, eight years of age living in 11 communities across the United States, had autism spectrum disorder (ASD), a developmental disability that can cause significant social, communication, and behavior challenges. Total annual costs associated with ASD have been estimated between \$11.5–\$60.9 billion, yet major gaps in knowledge remain about risk factors for ASD, and associated challenges and needs for persons with ASD and their families. Additionally, while most research on ASD has focused on children, ASD is considered a lifelong condition, and although an estimated 70,000 to 111,000 youth with ASD turn 18 years of age annually, little is known about the transition to adolescence and adulthood for persons with ASD. Despite the call to address transition and lifespan issues in the Autism CARES Acts of 2014 and 2019, only 2% of ASD funding from 2008 to 2018 was spent on lifespan issues.

The 2016–2017 Interagency Autism Coordinating Committee (IACC) Strategic Plan highlighted the need for more information about the services and

support needed to maximize the quality of life for people on the autism spectrum, especially as individuals with ASD progress into adulthood.

The current information collection request is to conduct longitudinal follow-up studies of SEED 1–3 participants at older ages, thereby addressing the priorities established in the Autism CARES Acts of 2014 and 2019, and the need for research highlighted in the IACC Strategic Plan. Given the size of the original SEED birth cohorts and the wealth of baseline information collected, a follow-up study of participants can help us address the research gaps described above. The information collected from this study will allow us to better understand the developmental trajectory of children with ASD, their health outcomes and co-occurring conditions at older ages, and the associated early predictors of these outcomes, including intellectual abilities.

The data collected in this study also provides the opportunity to obtain important self-reported measures of well-being among young adults with ASD. Recent evidence suggests that individuals with ASD with average to above average levels of intellectual functioning may still struggle with activities of daily living. Yet, adults with special needs are often required to have an intellectual disability in order to qualify for services. This data will allow investigators to describe the gap between intellectual ability and daily living skills in adolescents with ASD to inform public policies on eligibility for services. Additionally, because most SEED 1 participants will reach young adulthood (i.e., age 18 years) in years 2021–2026, data collected through this study will provide an opportunity to assess changes in service access and utilization that may occur following high school exit. This period is particularly challenging for young adults with ASD who can experience poor outcomes across multiple domains (e.g., employment, education, social engagement, independent living, and access to health and mental health care services in association with the loss of well-integrated school-based services). Hence, through surveying SEED 1 participants before and after their anticipated exit from high school, data collected through this study could provide important information on the loss of services and emerging issues that can inform service delivery and programs on the support needed to achieve greater independence.

Initial follow-up surveys of SEED participants will be conducted with the parents of the children who previously

participated in SEED because it is the parents who provided consent for follow-up studies. However, many emerging issues surrounding the transition to adulthood among adolescents with ASD require self, rather than parental report (e.g., self-

reported symptoms of anxiety, depression, quality of life, social camouflaging, gender identity, sexuality, and relationships). Children who originally participated at age 2–5 years, who are now adolescents and young adults, will be contacted through

their parents and asked if they wish to provide informed consent for participation in surveys.

CDC requests OMB approval for an estimated 6,193 annual burden hours. There are no costs to respondents other than their time to participate.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

[Document Identifier: OS–4040–0014]

Agency Information Collection Request; 60-Day Public Comment Request

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: In compliance with the requirement of the Paperwork Reduction Act of 1995, the Office of the Secretary (OS), Department of Health and Human Services, is publishing the following summary of a proposed collection for public comment.

DATES: Comments on the ICR must be received on or before December 3, 2021.

ADDRESSES: Submit your comments to sagal.musa@hhs.gov or by calling (202) 205–2634.

FOR FURTHER INFORMATION CONTACT: When submitting comments or requesting information, please include the document identifier 4040–0014–NEW–60D and project title for reference, to Sagal Musa, email: sagal.musa@hhs.gov, or call (202) 205–2634 the Reports Clearance Officer.

SUPPLEMENTARY INFORMATION: Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency’s functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Title of the Collection: Federal Financial Report (SF–425) and Federal

Financial Report Attachment (SF–425A).

Type of Collection: Renewal.

OMB No. 4040–0014.

Abstract

Abstract: Federal Financial Report (SF–425) and Federal Financial Report Attachment (SF–425A) are used by applicants to apply for Federal financial assistance. The Federal Financial Report (SF–425) and Federal Financial Report Attachment (SF–425A) forms allow the applicants to provide certain financial information as part of their grant proposals. These forms are evaluated by Federal agencies as part of the overall grant application. This IC expires on February 28, 2022. Grants.gov seeks a three-year clearance of these collections.

Type of Respondent: The Federal Financial Report (SF–425) and Federal Financial Report Attachment (SF–425A) forms are used by organizations to apply for Federal financial assistance in the form of grants. These forms are submitted to the Federal grant-making agencies for evaluation and review.
