

any of the NDX option series used for the Closing VWAP for potential manipulation on the Exchange.

Utilizing a time period of one second to acquire a new observation window would allow the Exchange to utilize an observation window closest in time to the original window. Also, moving forward in increments of one second, as necessary, would serve to methodically move through the trading day for a potential observation window that would satisfy the Exchange's liquidity requirements.

The Exchange's proposal to amend the term "executed orders" to exclude out-of-sequence and late trades is consistent with the Act as these values may represent potential stale data in the Closing VWAP calculation. The Exchange believes the midpoint better reflects the price of a component.

Finally, the Exchange's proposal to amend current Options 4A, Section 12(b)(6)(D)(II) to remove the 12:00 p.m. deadline for publishing a settlement value is consistent with the Act because a re-opening could occur anytime during the trading day and, therefore, citing specifically to a 12:00 p.m. timeframe does not consider all possible scenarios. Further, specifically indicating a trading halt of the Nasdaq-100 index options in the rule text is more precise as the impact to the Nasdaq-100 index options is a direct concern for VOLQ. The proposed language more directly expands upon the manner in which the Closing VWAP will be handled in the event of a trading halt.

B. Self-Regulatory Organization's Statement on Burden on Competition

This proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange notes that the proposed alternative observation windows will facilitate the listing and trading of the Volatility Index by ensuring liquidity for each of the option components. The proposed structure will enhance competition among market participants, to the benefit of investors and the marketplace.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission shall: (a) By order approve or disapprove such proposed rule change, or (b) institute proceedings to determine whether the proposed rule change should be disapproved.

A. Self-Regulatory Organization’s Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to extend the pilot related to the market-wide circuit breaker in Rule 7.12-E to the close of business on March 18, 2022.

Background

The Market-Wide Circuit Breaker (“MWCBS”) rules, including the Exchange’s Rule 7.12-E, provide an important, automatic mechanism that is invoked to promote stability and investor confidence during periods of significant stress when cash equities securities experience extreme market-wide declines. The MWCBS rules are designed to slow the effects of extreme price declines through coordinated trading halts across both cash equity and equity options securities markets.

The cash equities rules governing MWCBS were first adopted in 1988 and, in 2012, all U.S. cash equity exchanges and FINRA amended their cash equities uniform rules on a pilot basis (the “Pilot Rules,” *i.e.*, Rule 7.12-E (a)-(d)).⁴ The Pilot Rules currently provide for trading halts in all cash equity securities during a severe market decline as measured by a single-day decline in the S&P 500 Index (“SPX”).⁵ Under the Pilot Rules, a market-wide trading halt will be triggered if SPX declines in price by specified percentages from the prior day’s closing price of that index. The triggers are set at three circuit breaker thresholds: 7% (Level 1), 13% (Level 2), and 20% (Level 3). A market decline that triggers a Level 1 or Level 2 halt after 9:30 a.m. and before 3:25 p.m. would halt market-wide trading for 15 minutes, while a similar market decline at or after 3:25 p.m. would not halt market-wide trading. (Level 1 and Level 2 halts may occur only once a day.) A market decline that triggers a Level 3 halt at any time during the trading day would halt market-wide trading for the remainder of the trading day.

The Commission approved the Pilot Rules, the term of which was to

⁵ The rules of the equity options exchanges similarly provide for a halt in trading if the cash equity exchanges invoke a MWCBS Halt. *See, e.g.*, NYSE Arca Rule 6.65-O(d)(4).
