defined as all “activities and measures

Preparedness Research: Instruments

*Abstract:* The economic and human  
toll of major disasters in the United  
States is increasing and historically  
underserved communities are  
disproportionately impacted. Poverty,  
race, limited English proficiency, age,  
and other demographic, cultural, and  
socio-economic variables can  
significantly inhibit people’s ability to  
take steps to prepare. To reverse this  
trend, emergency managers must ensure  
historically underserved communities  
receive critical information that helps  
each person take steps to prepare  
themselves, their families, and their  
communities. To achieve equity in  
opportunities to prepare for disasters,  
FEMA proposes a series of qualitative  
focus groups, cognitive interviews, and  
targeted surveys to better understand  
individual experiences within  
historically underserved communities  
during recent disasters. FEMA Form  
519–0–54 is a combined instrument that  
contains the script and question bank  
for conducting the focus groups,  
cognitive interviews, and surveys.
