

Information Collection Requirement

Title: Pipeline Operator Security Information.

Type of Request: Extension of a currently approved collection.

OMB Control Number: 1652–0055.

Forms(s): CISA Reporting System form.

Affected Public: Pipeline system operators.

Abstract: In addition to TSA's broad responsibility and authority for "security in all modes of transportation" under 49 U.S.C. 114(d), TSA is statutorily required to develop and transmit to pipeline operators security recommendations for natural gas and hazardous liquid pipelines and pipeline facilities. See sec. 1557 of the Implementing Recommendations of the 9/11 Commission Act of 2007, Public Law 110–53 (121 Stat. 266; August 3, 2007), codified at 6 U.S.C. 1207. Consistent with these requirements, TSA produced Pipeline Security Guidelines in December 2010, and April 2011, with updates published in March 2018 and April 2021. Among the recommendations, TSA encourages pipeline operators to notify TSA of all (1) incidents that may indicate a deliberate attempt to disrupt pipeline operations; and (2) activities that could be precursors to such an attempt.

In addition, on May 26, 2021, OMB approved TSA's request for an emergency revision of this information collection based on TSA's issuance of a Security Directive (SD) with requirements for TSA-specified critical pipeline owner/operators of hazardous liquid and natural gas pipelines and liquefied natural gas facilities to report cybersecurity incidents or potential cybersecurity incidents on their information and operational technology systems to the Cybersecurity and Infrastructure Security Agency (CISA) within 12 hours of identification of a cybersecurity incident using the CISA Reporting System. The SD also requires critical pipeline owner/operators to appoint cybersecurity coordinators, who must be available to TSA and CISA 24/7 to coordinate cybersecurity practices and address any incidents that arise, and to provide contact information for the coordinators to TSA.¹

Number of Respondents: 100.

¹ The additional requirement in the SD to conduct a cybersecurity assessment is covered under a separate OMB control number 1652–0050 Critical Facility Information of the Top 100 Most Critical Pipelines.

Estimated Annual Burden Hours: An estimated 4,033 hours annually.²
