SUPPLEMENTARY INFORMATION: On October 12, 2021, FEMA published a Request for Information (RFI) on the National Flood Insurance Program's (NFIP) Floodplain Management Standards for Land Management and Use, and an Assessment of the Program's Impact on Threatened and Endangered Species and Their Habitats.¹ This RFI asks for public input on the floodplain management standards that communities should adopt to result in safer, stronger, and more resilient communities. It also seeks input on how the NFIP can better promote protection of and minimize any adverse impact to threatened and endangered species, and their habitats.

In support of FEMA's role in setting the NFIP floodplain management standards for land management and use and the agency's desire to strengthen the NFIP's protection of threatened and endangered species and their habitat, the agency is seeking input from the public on the floodplain management standards that communities should

adopt to result in safer, stronger, and more resilient communities and also to promote protection of listed species and their critical habitats. Specifically, FEMA is seeking input through a series of questions in the RFI on opportunities for the agency to improve the minimum floodplain management standards for land management and use which better align the NFIP with the current understanding of flood risk and flood risk reduction approaches. Current FEMA floodplain management standards for flood-prone area regulations have not been revised since they were implemented in 1976. The agency is considering revision to these regulations based on its current understanding of flood risk and flood risk reduction approaches and is now taking a thorough review of the floodplain management standards, along with prior published studies and reports, to determine how these standards can best meet FEMA and stakeholder needs.²

FEMA also plans to re-evaluate the implementation of the NFIP under the Endangered Species Act at the national level to complete a revised Biological Evaluation³ re-examining how NFIP actions influence land development decisions; the potential for such actions to have adverse effects on listed species and critical habitats; and to identify program changes to mitigate adverse effects to avoid jeopardy to listed species and/or critical habitats. Public feedback will help FEMA with this process.

The purpose of this request for information is to seek feedback on the agency's request for information on the National Flood Insurance Program's (NFIP) Floodplain Management Standards for Land Management and Use, and an Assessment of the Program's Impact on Threatened and Endangered Species and Their Habitat published October 12, 2021. Individuals cannot apply for FEMA assistance by submitting a comment in the **Federal Register** or at these public meetings. individual or call the FEMA Helpline (1-800-621-3362/TTY (800) 462-7585) to apply or receive information on a pending request.

FEMA will hold public meetings to ensure all interested parties have sufficient opportunity to provide comments on FEMA programs. As the RFI seeks information regarding a series of questions, the public may wish to review the RFI in advance of these meetings. FEMA will carefully consider all relevant comments received during the meetings, and during the rest of the RFI's comment period. All comments or remarks provided on the request for information during the meeting will be recorded and posted to the rulemaking docket on <https://www.regulations.gov>.
