Amendment 34 to the Coastal Migratory Pelagics FMP

The South Atlantic and Gulf of Mexico Fishery Management Councils are considering action to address updated scientific information provided by an update to the Southeast Data Assessment and Review (SEDAR) stock assessment for Atlantic king mackerel (SEDAR 38 Update 2020). The stock assessment, which included revised recreational landings that are based on the Marine Recreational Information Program's newer Fishing Effort Survey method, indicated that Atlantic king mackerel was not overfished nor undergoing overfishing. The draft amendment currently includes actions to update the Atlantic king mackerel acceptable biological catch, annual catch limits, sector allocations, and recreational annual catch targets, and modify recreational bag limits, commercial and recreational minimum size limits, and the requirement to land Atlantic king and Spanish mackerel with heads and fins intact.

During the public hearings, Council staff will present an overview of the amendment and will be available for informal discussions and to answer questions via webinar. Members of the public will have an opportunity to go on record to record their comments for consideration by the Council.

These hearings are physically accessible to people with disabilities. Requests for auxiliary aids should be directed to the Council office (see **ADDRESSES**) 3 days prior to the meeting.
