Endangered and Threatened Species; Take of Anadromous Fish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability; proposed evaluation and pending determinations for five resource management plans in the Hood Canal Basin.

SUMMARY: Notice is hereby given that NMFS has drafted Proposed Evaluation and Pending Determinations (PEPD) for five resource management plans (RMPs) for the rearing and releasing Chinook

salmon, coho salmon, and chum salmon, and for research of Puget Sound Steelhead in the Hood Canal Basin of Washington State. The RMPs are in the form of hatchery and genetic management plans (HGMPs) for hatchery programs operated by Long Live the Kings (LLTK), the Port Gamble S’Klallam Tribe (PGST), the Skokomish Tribe (ST), and Washington Department of Fish and Wildlife (WDFW). In 2016 NMFS certified that the five HGMPs satisfied limit 6 of the 4(d) rule. The revised HGMPs will replace the versions of the same plans now in place. NMFS is notifying the public of the availability and opportunity to comment on PEPDs for the new programs. The hatchery programs are intended to contribute to fulfilling Federal tribal trust responsibilities and treaty rights guaranteed through treaties and affirmed in *U.S. v. Washington* (1974). The program operators submitted revised HGMPs for the following changes: (1) Improve the available forage to southern resident killer whales; and (2) investigate genetic diversity of Puget Sound Steelhead and the effects of release timing on marine survival of fall Chinook salmon.
