

participants use QIX OTCBB to connect, such that after this decommissioning, there will be no further basis for offering or charging fees for use of QIX OTCBB ports. The other proposals, to discontinue offering and charging fees for ports using the CTCI/TCP, CTCI/MQ, BRUT FIX, and SUMO FIX order entry protocols are reasonable because these order entry protocols are associated with legacy applications and have become obsolete and the Exchange wishes to transition market participants to the newer and more capable FIX order entry protocol. The Exchange proposes to continue offering and charging fees for the CTCI MFUND order entry protocol because customers that utilize it cannot currently attain their existing functionality through the use of FIX.

The Exchange believes that it is an equitable allocation of its fees to cease charging customers for ports that connect to discontinued platforms or that use order entry protocols that have become obsolete and will be replaced with newer and more capable protocols.

The proposals are not unfairly discriminatory to existing users of the order entry protocols that the Exchange will eliminate. The Exchange continually invests in new technologies to serve its customers' growing and evolving needs. At the same time it deploys new technologies, the Exchange must also periodically cease to support, or retire, technologies that have become obsolete and are no longer widely used. To mitigate the effect of transitions to new technologies in this instance, the Exchange has provided ample prior notice to market participants and has assisted them in the transition process. As of the date of this filing, Nasdaq has already transitioned most of its customers from CTCI/TCP, CTCI/MQ, BRUT FIX, and SUMO FIX to using the FIX order entry protocol, such that the proposals will little to no practical impact on them. Given that FINRA plans to decommission OTCBB, Nasdaq's proposal to eliminate QIX OTCBB should have no effect on them.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that its proposed rule changes will impose any burden on competition. Again, the proposals to eliminate the QIX OTCBB order entry protocol will merely help to effectuate FINRA's elimination of the OTCBB platform, while the proposed elimination of the CTCI/TCP, CTCI/MQ, BRUT FIX, and SUMO FIX order entry protocols will serve to transition market participants to a newer and more capable alternative to these protocols.

Participants should suffer no adverse competitive impact from the elimination of these order entry protocols.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act¹³ and Rule 19b-4(f)(6) thereunder.¹⁴

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-93581; File No. SR-ICC-2021-019]

Self-Regulatory Organizations; ICE Clear Credit LLC; Order Approving Proposed Rule Change Relating to the ICC CDS Instrument On-Boarding Policies and Procedures

November 16, 2021.

I. Introduction

On September 22, 2021, ICE Clear Credit LLC ("ICC") filed with the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act

of 1934 (the "Act"),¹ and Rule 19b-4,² a proposed rule change to revise the ICC CDS Instrument On-boarding Policies and Procedures ("Instrument On-boarding Policy"). The proposed rule change was published for comment in the **Federal Register** on October 5, 2021.³ The Commission did not receive comments regarding the proposed rule change. For the reasons discussed below, the Commission is approving the proposed rule change.

II. Description of the Proposed Rule Change

The proposed rule change would revise Subsection III.A of the Instrument On-boarding Policy.⁴ Subsection III.A discusses the guiding principles that ICC maintains for considering instruments for clearing. Such principles are designed to ensure that ICC proceeds in a prudent manner with respect to instrument selection while also providing the best opportunity for Clearing Participants to minimize their risk.

The proposed rule change would incorporate an additional guiding principle—ICC should consider selecting for clearing instruments that are constituents of the currently clearable On-The-Run ("OTR") indices in order to provide additional instruments for Clearing Participants to hedge and mitigate indirect risk exposure from the OTR indices. For other instruments that are not constituents of currently clearable OTR indices, the proposed rule change would not alter the current guiding principles, which direct ICC to consider instrument open interest and volume when selecting instruments for clearing. Moreover, the proposed rule change would not alter the overall current guiding principles for all instruments, which direct ICC to consider selecting for clearing instruments that can be cleared through ICC's systems and processes and that support industry-wide initiatives and protocols.

III. Discussion and Commission Findings

Section 19(b)(2)(C) of the Act directs the Commission to approve a proposed rule change of a self-regulatory

organization if it finds that such proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to such organization.⁵ For the reasons given below, the Commission finds that the proposed rule change is consistent with Section 17A(b)(3)(F) of the Act and Rule 17Ad-22(e)(21).⁶

A. Consistency With Section 17A(b)(3)(F) of the Act

Section 17A(b)(3)(F) of the Act requires, among other things, that the rules of ICC be designed to promote the prompt and accurate clearance and settlement of securities transactions and, to the extent applicable, derivative agreements, contracts, and transactions, as well as to assure the safeguarding of securities and funds which are in the custody or control of ICC or for which it is responsible.⁷ As discussed above, the proposed rule change would add to the Instrument On-boarding Policy, as a further guiding principle, that ICC should consider selecting for clearing instruments that are constituents of the currently clearable OTR indices in order to provide Clearing Participants additional instruments to hedge and mitigate indirect risk exposure from the OTR indices. The Commission believes that this additional guiding principle should encourage ICC to select for clearing instruments that, as constituents of the currently clearable OTR indices, could help ICC's Clearing Participants mitigate indirect risk exposure from the OTR indices. The Commission believes that such potential risk mitigation would encourage Clearing Participants to centrally clear additional transactions, which, in turn, should promote the prompt and accurate clearance and settlement of those instruments.

Moreover, as set forth in the new guiding principle, the Commission believes that clearing instruments that are constituents of the currently clearable OTR indices could allow ICC's Clearing Participants to hedge and mitigate indirect risk exposure from the OTR indices. Thus, assuming that ICC selects such instruments for clearing, the Commission believes that the new guiding principle could result in ICC's Clearing Participants mitigating their overall indirect risk exposure to OTR indices, and thereby could reduce the overall risks to ICC in clearing and settling transactions in OTR indices. The Commission further believes that
