**SUPPLEMENTARY INFORMATION:** On October 27, 2021, OSHA issued an ANPRM to initiate rulemaking to protect indoor and outdoor workers from hazardous heat and to obtain additional information about the extent and nature of hazardous heat in the workplace and the nature and effectiveness of interventions and controls used to prevent heat-related injury and illness.

The public comment period for the ANPRM was to close on December 27, 2021, 60 days after publication of the ANPRM. However, OSHA received requests from stakeholders to extend the comment period by an additional 30 days (Document ID 0145) or 60 days (Document ID 0101, 0133, 0141, 0143, 0144, 0148, 0152, 0159). These stakeholders explained that they need additional time to carefully review the questions in the ANPRM, obtain input from members, and provide comments (see, e.g., Document ID 0101).

OSHA agrees to an extension of the public comment period and believes a 30-day extension is sufficient and appropriate in order to balance the agency's need for timely input to inform how the agency will proceed with the rulemaking with these stakeholder requests. Therefore, OSHA is extending the public comment period until January 26, 2022.
