Specifically, the program’s purpose is to assist in the desegregation of public schools by supporting the elimination, reduction, and prevention of minority group isolation in elementary and secondary schools with substantial numbers of minority group students. Funded projects include the development and implementation of magnet schools that assist LEAs to create more diverse learning environments, as well as to achieve systemic reforms and provide opportunities for all students to meet challenging academic content and student academic achievement standards. MSAP projects support the development and design of innovative education methods and practices in new or existing magnet schools that will promote diversity and increase choices in public education programs. Finally, the program is intended to support the LEA’s capacity development to continue the operation of the magnet schools at a high performance level after funding ends.

The U.S. Department of Education is requesting to revise a collection with one new form to make awards under the Magnet Schools Assistance Program (MSAP) using the approved application for grants (OMB Control Number 1855–0011). This collection is being submitted under the Streamlined Clearance Process for Discretionary Grant Information Collections (1894–0001). ## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

[Docket No. CP21–78–000]

#### **ANR Pipeline Company; Notice of Availability of The Draft Environmental Impact Statement for the Proposed Wisconsin Access Project**

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared a draft

environmental impact statement (EIS) for the Wisconsin Access Project, proposed by ANR Pipeline Company (ANR) in the above-referenced docket. ANR requests authorization to modify seven existing meter stations in Oneida, Marathon, Oconto, and Manitowoc Counties, Wisconsin and increase firm transportation capacity on its pipeline by 50,707 dekatherms per day.

The draft EIS assesses the potential environmental effects of the construction and operation of the Wisconsin Access Project in accordance with the requirements of the National Environmental Policy Act. With the exception of climate change impacts, FERC staff concludes that approval of the Project would not result in significant environmental impacts. FERC staff is unable to determine the significance level of climate change impacts.

The draft EIS addresses the potential environmental effects of the construction and operation of minor modifications to ANR’s existing Coleman, Lena, Meeme, Mosinee, Rhinelander, Suring, and Two Rivers Meter Stations. The modifications include the replacement of some metering and filtering equipment, installation of additional metering equipment, and replacement of two meter station buildings at the Lena and Rhinelander Meter Stations.

The Commission mailed a copy of the *Notice of Availability of the Draft Environmental Impact Statement for the Wisconsin Access Project* to federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American tribes; potentially affected landowners and other interested individuals and groups; and newspapers and libraries in the project area. The draft EIS is only available in electronic format. It may be viewed and downloaded from the FERC’s website ([www.ferc.gov](http://www.ferc.gov)), on the natural gas environmental documents page (<https://www.ferc.gov/industries-data/natural-gas/environmental-documents/>). In addition, the draft EIS may be accessed by using the eLibrary link on the FERC’s website.
