

fuels facility. As part of this Renewable Fuels Project, existing equipment will be re-used and re-purposed, new equipment will be installed, unneeded equipment will be eliminated or permanently idled, and project upgrades to existing equipment will be made to improve efficiencies and reduce operational emissions. In its Non-Applicability Determination, the EPA determined that the Renewable Fuels Project will not result in a major PSD modification.

DATES: The PSD Non-Applicability Determination issued on November 3, 2021, was a final agency action. Pursuant to section 307(b)(1) of the Clean Air Act, 42 U.S.C. 7607(b)(1), judicial review of this final agency action may be sought by filing a petition for review in the United States Court of Appeals for the Ninth Circuit within 60 days of December 13, 2021.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA-R09-OAR-2021-0629. Publicly available docket materials, including the determination letter and supporting documentation, are available through <https://www.regulations.gov>, or by contacting the person identified in the **FOR FURTHER INFORMATION CONTACT** section.

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060-1261; FR ID 61604]

Information Collection Being Reviewed by the Federal Communications Commission Under Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

DATES: Written PRA comments should be submitted on or before February 11, 2022. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email PRA@fcc.gov and to nicole.ongele@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele, (202) 418-2991.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-1261.

Title: Creation of Interstitial 12.5 KiloHertz Channels in the 800 MHz Band Between 809-817/854-862 MHz.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit; Not-for-profit institutions; State, Local or Tribal Government.

Number of Respondents and Responses: 732 respondents, 366 responses.

Estimated Time per Response: 2 hours.

Frequency of Response: One-time reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this collection is contained in 47 U.S.C. 151, 154, 301, 303, and 332 of the Communications Act of 1934.

Total Annual Burden: 732 hours.

Total Annual Cost: No Cost.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality:

There is no need for applicants filing applications to license channels in the 809-817/854-862 MHz band segment (800 MHz Mid-Band) to include confidential information with their application. Nonetheless, there is a need for confidentiality with respect to all applications filed with the Commission through its Universal Licensing System (ULS). Although ULS stores all information pertaining to the individual license via an FCC Registration Number (FRN), confidential information is accessible only by persons or entities that hold the password for each account, and the Commission's licensing staff. Information on private land mobile radio licensees is maintained in the Commission's system of records, FCC/WTB-1, "Wireless Services Licensing Records." The licensee records will be publicly available and routinely used in accordance with subsection (b) of the Privacy Act. TIN Numbers and material which is afforded confidential treatment pursuant to a request made under 47 CFR 0.459 will not be available for Public inspection. Any personally identifiable information (PII) that individual applicants provide is covered by a system of records, FCC/WTB-1, "Wireless Services Licensing Records," and these and all other records may be disclosed pursuant to the Routine Uses as stated in this system of records notice.

Needs and Uses: This collection will be submitted as a new collection after this 60-day comment period to the Office of Management and Budget (OMB) in order to obtain the full three-year clearance. Section 90.621(d)(4) adopted in the Commission's Report and Order FCC 18-143 requires an applicant to include a letter of concurrence from an incumbent licensee if the applicant files an application which causes contour overlap under a forward analysis or receives contour overlap under a reciprocal analysis when the applicant seeks to license channels in the 800 MHz Mid-Band. In the case of the forward analysis, the incumbent licensee must agree in its concurrence

letter to accept any interference that occurs as a result of the contour overlap. In the case of the reciprocal analysis, the incumbent licensee must state in its concurrence letter that it does not object to the applicant receiving contour overlap from the incumbent's facility. The purpose of requiring applicants to obtain letters of concurrence if their application causes contour overlap under a forward analysis or receives contour overlap under a reciprocal analysis is to ensure incumbents in the 800 MHz Mid-Band are aware of the contour overlap before an application is granted.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.
