Needs and Uses: The Commission uses the study area boundary data collected through 3060–1181 to implement certain universal service reforms. The Universal Service Fund supports the deployment of voice and broadband-capable infrastructure in rural, high cost areas. High-cost support is granted to a carrier based on the characteristics of its “study area,” the geographic area served by an incumbent local exchange carrier within a state. Therefore, complete and accurate study area boundary data are essential for calculating a carrier’s costs and expenses, which in turn determine the amount of support that carrier can receive to serve high-cost areas. In December 2012, the Commission submitted a request for emergency preapproval of this collection, which the Office of Management and Budget (OMB) granted on January 23, 2013. On June 12, 2013, the Commission submitted a request for a three-year extension of the collection to July 31, 2016 (78 FR 34382), which OMB approved on July 31, 2013 (78 FR 76312). Initial study area boundaries were submitted in 2013. These maps were submitted via a secure internet-browser web interface developed and maintained by the Commission. If a study area boundary changes, filers are required to submit, via this interface, revised boundary data incorporating such changes by March 15 of the year following the change. In addition, all filers are required to recertify their study area boundaries every two years.
