In accordance with section 359e of the Agricultural Adjustment Act of 1938, as amended, after evaluating each sugar beet processor's ability to market its full allocation after the OAQ increase, USDA is transferring allocations from beet sugar processors with surplus allocation to those with deficit allocation as shown in the Table above, in the column titled "Adjusted FY 2022 Allocations as of December 2021."

These actions will result in a transfer of 304,674 STRV of allocation to beet processors with a deficit allocation, an amount sufficient to allow them to market their entire FY 2022 beet sugar supply. USDA has determined that no reassignment of allotments among sugarcane States and allocations among cane processors is necessary at this time.

USDA will closely monitor stocks, consumption, imports and all sugar market and program variables on an ongoing basis and may make further program adjustments during FY 2022 if needed.
