

Covered Species

The California red-legged frog (*Rana draytonii*), a species federally listed as threatened, is proposed to be included as a covered species in the proposed HCP.

No-Action Alternative

Under the No-Action Alternative, the Service would not issue an ITP to the applicant, and routine operations and maintenance activities and pond monitoring and maintenance would not be implemented. The No-Action Alternative is not feasible, based on the purpose and need of the operations and maintenance activities. Without the action, Lehigh would not be able to maintain compliance with applicable water quality and erosion control requirements and operational safety standards. Lehigh is mandated by the State Water Resources Control Board to comply with existing and applicable Clean Water Act permits and Water Quality Certifications; full compliance would not be possible if operations and maintenance activities are not conducted. In addition, not implementing these activities would result in erosion and sedimentation that degrade habitat for the California red-legged frog. Finally, without the Covered Activities, safety of on-site material transport and vehicle travel would be jeopardized. For these reasons, the No-Action Alternative has been rejected.

Reduced Project Alternative

Under the reduced project alternative, the Service would issue an ITP to the applicant for a period of 20 years for the same covered activities and species described for the Proposed Action Alternative, but within a reduced HCP area. The smaller HCP area would presumably result in reduced probability for take of California red-legged frog. However, the HCP area associated with the Proposed Action Alternative has been minimized to the smallest possible footprint to fulfill requirements of the existing storm water pollution prevention plan and applicable permits associated with quarry operation, and to preserve safe quarry operations. In addition, a reduced HCP area would reduce the extent and effectiveness of erosion and sedimentation control measures, potentially resulting in degradation of California red-legged frog habitat. For these reasons, the Reduced Project Alternative would not accomplish the project's goals and has been rejected.

Public Comments

We request data, comments, new information, or suggestions from the public, other concerned governmental agencies, the scientific community, Tribes, industry, or any other interested party on this notice, the draft screening form, and the draft HCP. We particularly seek comments on the following:

1. Biological information concerning the species;
2. Relevant data concerning the species;
3. Additional information concerning the range, distribution, population size, and population trends of the species;
4. Current or planned activities in the area and their possible impacts on the species;
5. The presence of archeological sites, buildings and structures, historic events, sacred and traditional areas, and other historic preservation concerns, which are required to be considered in project planning by the National Historic Preservation Act; and
6. Any other environmental issues that should be considered with regard to the proposed development and permit action.

Public Availability of Comments

Before including your address, phone number, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—might be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Next Steps

Issuance of an incidental take permit is a Federal proposed action subject to compliance with NEPA and section 7 of the ESA. We will evaluate the application, associated documents, and any public comments we receive as part of our NEPA compliance process to determine whether the application meets the requirements of section 10(a) of the ESA. If we determine that those requirements are met, we will conduct an intra-Service consultation under section 7 of the ESA for the Federal action for the potential issuance of an ITP. If the intra-Service consultation confirms that issuance of the ITP will not jeopardize the continued existence of any endangered or threatened species, or destroy or adversely modify critical habitat, we will issue a permit to the applicant for the incidental take of the covered species.

Authority

We publish this notice under the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321–4347 *et seq.*), and its implementing regulations at 40 CFR 1500–1508, as well as in compliance with section 10(c) of the Endangered Species Act (16 U.S.C. 1531–1544 *et seq.*) and its implementing regulations at 50 CFR 17.32(b)(1)(ii).

Michael Fris,

Field Supervisor, Sacramento Fish and Wildlife Office, U.S. Fish and Wildlife Service, Sacramento, California.

Receipt of Incidental Take Permit Application and Proposed Habitat Conservation Plan for the Indiana Crossroads Wind Farm, White County, Indiana; Categorical Exclusion

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability of documents; request for comment and information.

SUMMARY: We, the U.S. Fish and Wildlife Service, have received an application from Indiana Crossroads Wind Farm LLC (applicant), for an incidental take permit (ITP) under the Endangered Species Act, for its Indiana Crossroads Wind Farm (project). If approved, the ITP would be for a 6-year period and would authorize the incidental take of an endangered species, the Indiana bat, and a threatened species, the northern long-eared bat. The applicant has prepared a habitat conservation plan that describes the actions and measures that the applicant would implement to avoid, minimize, and mitigate incidental take of the Indiana bat and northern long-eared bat. We request public comment on the application, which includes the applicant's proposed habitat conservation plan (HCP), and on the Service's preliminary determination that this HCP qualifies as "low-effect," categorically excluded under the National Environmental Policy Act. To make this determination, we used our environmental action statement and low-effect screening form, both of which are also able for public review.

DATES: We will accept comments received or postmarked on or before January 27, 2022.

ADDRESSES: *Document availability:*

Electronic copies of the documents this notice announces, along with public comments received, will be available online in Docket No. FWS–R3–ES–2021–0139 at <http://www.regulations.gov>.

Comment submission: In your comment, please specify whether your comment addresses the proposed HCP, draft environmental action statement, or any combination of the aforementioned documents, or other supporting documents. You may submit written comments by one of the following methods:

- *Online:* <http://www.regulations.gov>. Search for and submit comments on Docket No. FWS–R3–ES–2021–0139.

- *By hard copy:* Submit comments by U.S. mail to Public Comments Processing, Attn: Docket No. FWS–R3–ES–2021–0139; U.S. Fish and Wildlife Service; 5275 Leesburg Pike, MS: PRB/3W; Falls Church, VA 22041–3803.

FOR FURTHER INFORMATION CONTACT:

Scott Pruitt, Field Supervisor, Bloomington Ecological Services Field Office, U.S. Fish and Wildlife Service, 620 South Walker Street, Bloomington, IN 47403; telephone: 812–334–4261, extension 214; or Andrew Horton, Regional HCP Coordinator, U.S. Fish and Wildlife Service—Interior Region 3, 5600 American Blvd., West, Suite 990, Bloomington, MN 55437–1458; telephone: 612–713–5337.

Individuals who are hearing impaired or speech impaired may call the Federal Relay Service at 1–800–877–8339 for TTY assistance.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service, have received an application from Indiana Crossroads Wind Farm LLC (applicant) for an incidental take permit (ITP) under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The applicant requests the ITP to take the federally listed Indiana bat (*Myotis sodalis*) and northern long-eared bat (*Myotis septentrionalis*) incidental to the operation of 72 wind turbines with a total generating capacity of 302 megawatt (MW) at the Indiana Crossroads Wind Farm in White County, Indiana. While the ITP is for 6 years, the operational life of most new wind energy facilities is thirty years and intensive monitoring conducted during this permit term will inform the need for future avoidance or a new long-term ITP for the remaining life of the project that will comply with a new NEPA analysis and habitat conservation plan

(HCP). The applicant has prepared an HCP that describes the actions and measures that the applicant would implement to avoid, minimize, and mitigate incidental take of the covered species for the first 6 years. We request public comment on the application, which includes the applicant's proposed HCP, and on the Service's preliminary determination that this HCP qualifies as "low-effect," categorically excluded under the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*). To make this determination, we used our environmental action statement and low-effect screening form, both of which are also able for public review.

Background

Section 9 of the ESA and its implementing regulations prohibit the "take" of animal species listed as endangered or threatened. Take is defined under the ESA as to "harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect [listed animal species,] or to attempt to engage in any such conduct" (16 U.S.C. 1532). However, under section 10(a) of the ESA, we may issue permits to authorize incidental take of listed species. "Incidental take" is defined by the ESA as take that is incidental to, and not the purpose of, carrying out an otherwise lawful activity (16 U.S.C. 1539). Regulations governing incidental take permits for endangered and threatened species, respectively, are found in the Code of Federal Regulations at 50 CFR 17.22 and 50 CFR 17.32.

Applicant's Proposed Project

The applicant requests a 6-year ITP to take the federally endangered Indiana bat (*Myotis sodalis*) and threatened northern long-eared bat (*Myotis septentrionalis*). The applicant determined that take is reasonably certain to occur incidental to operation of 72 previously constructed wind turbines in White County, Indiana, consisting of approximately 32,763 acres of private land. The proposed conservation strategy in the applicant's proposed HCP is designed to avoid, minimize, and mitigate the impacts of the covered activity on the covered species. The biological goals and objectives are to minimize potential take of Indiana bats and northern long-eared bats through on-site minimization measures and to provide habitat conservation measures for Indiana bat and northern long-eared bat to offset any impacts from operations of the project. The HCP provides on-site avoidance and minimization measures, which include turbine operational

adjustments. The authorized level of take from the project is 18 Indiana bats and 18 northern long-eared bats over the 6-year permit duration. To offset the impacts of the taking of the species, the applicant will implement one or more of the following mitigation options: Purchase credits from an approved conservation bank, contribute to an in-lieu fee mitigation fund, implement permittee responsible mitigation project, or contribute to a white-nose syndrome treatment fund.

National Environmental Policy Act

The issuance of an ITP is a Federal action that triggers the need for compliance with NEPA. The Service has made a preliminary determination that the applicant's project and the proposed mitigation measures would individually and cumulatively have a minor or negligible effect on the covered species and the environment. Therefore, we have preliminarily concluded that the ITP for this project would qualify for categorical exclusion, and the HCP would be low effect under our NEPA regulations at 43 CFR 46.205 and 46.210. A low-effect HCP is one that would result in (1) minor or negligible effects on federally listed, proposed, and candidate species and their habitats; (2) minor or negligible effects on other environmental values or resources; and (3) impacts that, when considered together with the impacts of other past, present, and reasonable foreseeable similarly situated projects, would not result in significant cumulative effects to environmental values or resources over time.

Next Steps

The Service will evaluate the application and the comments received to determine whether the permit application meets the requirements of section 10(a) of the ESA. We will also conduct an intra-Service consultation pursuant to section 7 of the ESA to evaluate the effects of the proposed take. After considering the above findings, we will determine whether the permit issuance criteria of section 10(a)(1)(B) of the ESA have been met. If met, the Service will issue the requested ITP to the applicant.

Request for Public Comments

The Service invites comments and suggestions from all interested parties on the proposed HCP and screening form during a 30-day public comment period (see **DATES**). In particular, information and comments regarding the following topics are requested:

1. Whether adaptive management, monitoring, and mitigation provisions in the proposed HCP are sufficient;
2. The requested 6-year ITP term;
3. Any threats to the Indiana bat and the northern long-eared bat that may influence their populations over the life of the ITP that are not addressed in the proposed HCP or screening form;
4. Any new information on white-nose syndrome effects on the Indiana bat and the northern long-eared bat;
5. Whether or not the significance of the impact on various aspects of the human environment has been adequately analyzed; and
6. Any other information pertinent to evaluating the effects of the proposed action on the human environment, including those on the Indiana bat and the northern long-eared bat.

Availability of Public Comments

You may submit comments by one of the methods shown under **ADDRESSES**. We will post on <http://regulations.gov> all public comments and information received electronically or via hardcopy. All comments received, including names and addresses, will become part of the administrative record associated with this action. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can request in your comment that we withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

Authority

We provide this notice under section 10(c) of the ESA (16 U.S.C. 1531 *et seq.*) and its implementing regulations (50 CFR 17.22) and the NEPA (42 U.S.C. 4371 *et seq.*) and its implementing regulations (40 CFR 1500–1508 (2020); 43 CFR part 46).

Lori Nordstrom,

Assistant Regional Director, Ecological Services.

Number 1076–NEW]**

Agency Information Collection Activities; Tribal Colleges and Universities CARES Act and CRRSA Act Report

AGENCY: Bureau of Indian Education,
Interior.

ACTION: Notice of information collection;
request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, we, the Bureau of Indian Education (BIE), are proposing a new information collection.

DATES: Interested persons are invited to submit comments on or before February 28, 2022.

ADDRESSES: Send your comments on this information collection request (ICR) by mail to Steven Mullen, Information Collection Clearance Officer, Office of Regulatory Affairs and Collaborative Action—Indian Affairs, U.S. Department of the Interior, 1001 Indian School Road NW, Suite 229, Albuquerque, New Mexico 87104; or by email to comments@bia.gov. Please reference OMB Control Number 1076–NEW in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this ICR, contact Dr. Katherine Campbell, Program Analyst, Office of Research, Policy and Post-secondary, by email at Katherine.campbell@bie.edu or by telephone at (703) 390–6697. Individuals who are hearing or speech impaired may call the Federal Relay Service at 1–800–877–8339 for TTY assistance. You may also view the ICR at <http://www.reginfo.gov/public/do/PRAMain>.

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act of 1995 (PRA, 44 U.S.C. 3501 *et seq.*) and 5 CFR 1320.8(d)(1), all information collections require approval under the PRA. We may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number.

As part of our continuing effort to reduce paperwork and respondent burdens, we invite the public and other Federal agencies to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize

the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

We are especially interested in public comment addressing the following:

- (1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;
- (2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;
- (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and
- (4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: The Coronavirus Aid, Relief, and Economic Security (CARES) Act, Public Law 116–136, established the Education Stabilization Fund (ESF) and allocated \$30.75 billion to the U.S. Department of Education (ED). The Coronavirus Response and Relief Supplemental Appropriations (CRRSA) Act, Public Law 116–260, added \$81.9 billion to the ESF.

ED allocated ESF funds to the Secretary of Interior for programs operated or funded by the BIE to prevent, prepare for, and respond to the Novel Coronavirus Disease 2019 (COVID–19). Specifically, ED allocated one-half of 1 percent for the Secretary of Interior for programs operated or funded by the BIE. On June 12, 2020 ED and BIE executed a memorandum of agreement (ESF–BIE I Agreement) regarding the use of funds.

Additionally, the CRRSA Act requires ED to allocate one-half of 1 percent of
