k. *Description of Request:* On November 21, 2013, the Commission issued a new license for the Scotland Project with the boundary around the project reservoir at a contour elevation of 127 feet USGS datum. The approved boundary line is shown on the project's current Exhibit G (project boundary) drawings. The licensee seeks Commission approval of revised Exhibit G drawings that show a modified project boundary, based on improvements to the project's survey and property rights information. The modified boundary would remain at the 127-foot contour around the reservoir; however, the more accurate boundary line would enclose either more or less lands in certain areas to better follow the contour. The licensee also proposes boundary revisions near the dam and powerhouse to ensure all project facilities (e.g., fish passage, access road, switchyard, etc.) are fully enclosed within the boundary. The revised exhibit drawings do not modify the licensee's property rights under the project license.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, it must also serve a copy of the document on that resource agency.
