*Contact attempts include the time spent reviewing all follow-up letters and study materials, including the respondent website, interactions with field and telephone interviewers, the consent process including asking questions regarding rights as a participant and receiving responses, and all other exchanges during the recruitment and interviewing processes.

**To compute total estimated annual cost for Interviewing, the total burden hours were multiplied by the average hourly wage for each adult participant, according to a Bureau of Labor Statistics (BLS) chart called "Median usual weekly earnings of full-time wage and salary workers by educational attainment." (Median usual weekly earnings of full-time wage and salary workers by educational attainment (*bls.gov*)). We used the median salary for full-time employees over the age of 25 who are high school graduates with no college experience in the 2nd quarter of 2021 (\$19.83 per hour). * For the Facility Recruitment, the total average burden assumes an average hourly rate of \$25.09 for Community and Social Service Managers, given in the Bureau of Labor Statistic's Occupational Employment Statistics, May 2020.

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276–0361.

Project: Government Performance and Results Act (GPRA) Client/Participant Outcomes Measure—(OMB No. 0930–0208)—Revision

SAMHSA is requesting approval to modify its existing CSAT Client-level GPRA instrument by removing 48 questions and adding 42 questions for a

net decrease of six questions. In revising the CSAT–GPRA tool, we sought to improve functionality while also eliciting programmatic information that demonstrates impact at the client level. In this way, data from the revised GPRA tool can be used to assess resource allocation and to delineate who we serve, how we serve them, and how the program impacts clients from entry to discharge. Beyond this, much of the tool has been restructured to make its administration flow with greater ease, while also eliciting information that speaks to a client's experience with substance misuse, the concurrent use of substances and mental health. This is most apparent in Section B (Substance Use and Planned Services), where questions have been updated and restructured to elicit important aspects of a client's use of substances, namely the frequency of use and combinations of misused substances. This speaks to an emerging and urgent need to appropriately manage polysubstance misuse,¹ and the questions allow for evidence of change as the tool is readministered at different intervals. These questions do not rely on ICD–10 codes, so as to create a dialogue between the client and the individual administering the tool. Restructuring the tool has also included:

¹ Substance Abuse and Mental Health Services Administration (SAMHSA): Treating Concurrent Substance Use Among Adults. SAMHSA Publication No. PEP21–06–02–002. Rockville, MD: National Mental Health and Substance Use Policy Laboratory. Substance Abuse and Mental Health Services Administration, 2021.

- Placing many questions from the general GPRA Tool, that have previously been viewed as being specific to patient populations or grants, in the menu items found in Section H. This section allows Program Officers the opportunity to introduce grant specific questions as needed;
- Removing or substantially altering existing questions viewed as being potentially traumatizing or incentive to clients;
- Removing questions that have not been used in program evaluation at the federal level; and
- Incorporating evidence-based questions from tools such as the Addiction Severity Index to better address program performance.

Currently, the information collected from this instrument is entered and stored in SAMHSA's Performance Accountability and Reporting System, which is a real-time, performance management system that captures information on the substance abuse treatment and mental health services delivered in the United States. Continued approval of this information collection will allow SAMHSA to continue to meet Government Performance and Results Modernization Act of 2010 reporting requirements that quantify the effects and accomplishments of its discretionary grant programs, which are consistent with OMB guidance.

SAMHSA will use the data for annual reporting required by GPRA and comparing baseline with discharge and follow-up data. GPRA requires that

SAMHSA’s fiscal year report include actual results of performance monitoring for the three preceding fiscal years. The additional information

collected through this process will allow SAMHSA to: (1) Report results of these performance outcomes; (2) maintain consistency with SAMHSA-

specific performance domains, and (3) assess the accountability and performance of its discretionary and formula grant programs.
