SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811(a), authorizes the Secretary of Labor to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal or other mines.

Under 30 CFR parts 7 and 15, MSHA evaluates and approves explosive materials and blasting units as permissible for use in mines. However, some underground metal and nonmetal Category III mines (gassy mines) use non-approved explosive materials or blasting units because there are no approved explosive materials and blasting units.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection related to Explosive Materials and Blasting Units (pertains only to underground metal and Category III nonmetal mines deemed to be gassy). MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information has practical utility;

- Evaluate the accuracy of MSHA's estimate of the burden related to the information collection, including the validity of the methodology and assumptions used in the estimate;

- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and

- Minimize the burden of the information collection on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.
