BILLING CODE 6717-01-P

³ The hourly cost (for salary plus benefits) uses the figures from the Bureau of Labor Statistics, June 2021, for positions involved in the reporting and recordkeeping requirements. These figures include salary (https://www.bls.gov/oes/current/naics2_22.htm) and benefits (<http://www.bls.gov/news.release/ecec.nr0.htm>) and are:

- Electrical Engineer (Occupation Code: 17-2071; \$72.15/hour)
- Management Analyst (Occupation Code: 13-1111; \$68.39/hour)
- Accounting (Occupation Code: 13-2011; \$57.41/hours)
- Computer and Mathematical (Occupation Code: 15-0000; \$65.73/hour)
- Legal (Occupation Code: 23-0000; \$142.25/hour)

The average hourly cost (salary plus benefits) is calculated weighting each of the previously mentioned wage categories as follows: \$72.15/hour (0.4) + \$68.39/hour (0.2) + \$57.41/hour (0.1) + \$65.73/hour (0.1) + \$142.25/hour (0.2) = \$83.304/hour. The Commission rounds this figure to \$83/hour.

⁴ This figure was calculated by dividing the total number of responses (1,595) by the total number of respondents (47). The resulting figure was then rounded to the nearest thousandth place.

k. *Description of Request:* The licensee requests a temporary variance from the its River Flow Restoration Plan (Plan), required by Article 420 of the project license and approved by the Commission on February 7, 2014. The proposed variance would occur from March 1, 2022 to November 30, 2022 in support of the initial phase of a spill gate replacement project at Morony Dam. The replacement project in its entirety entails replacing the dam's nine radial spill gates with vertical slide gates over a three-year period. During the proposed variance period, the licensee would replace spill gates 4-7, and would therefore be unable to use them to restore flows during full plant trips, as required by the Plan. The licensee proposes to use a combination of spill gates 1-3 for flow restoration during any full plant trips while spill gates 4-7 are out of service. Consistent with the Plan, during the variance period, the licensee will provide a 7-minute long warning siren to alert the public that the spill gates are opening

and to allow the public time to relocate to a safe location.
