

in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at <https://www.regulations.gov>, or in person at the EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

Abstract: The Emission Guidelines for Commercial and Industrial Solid Waste Incineration (CISWI) units (40 CFR part 60, subpart DDDD) apply to any air quality program in either a state or a United States protectorate with one or more existing CISWI units that commenced construction either on or before April 29, 2010. In general, all emission guidelines require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance with 40 CFR part 60, subpart DDDD.

Form Numbers: None.

Respondents/affected entities:

Owners and operators of existing CISWI units.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart DDDD).

Estimated number of respondents: 78 (total).

Frequency of response: Semiannual, annual.

Total estimated burden: 9,890 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$12,200,000 (per year), which includes \$11,000,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is a decrease in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to several considerations. The growth rate for this industry is very low or non-existent, so there is no change in the number of respondents. The regulations have changed over the past three years; however, the amendments did not result in any changes in burden. The labor calculations for incinerators were corrected to remove one instance in the previous ICR, where labor costs for continuous parameter monitoring were double-counted. The labor calculations

for incinerators were also corrected to revise the number of respondents submitting a status report, corrective action summary, and semiannual report to reflect reports submitted for 10 percent of the total number of CISWI units. The overall result is a decrease in burden hours. The costs for annual performance testing were updated from 2008 to 2020 using the CEPCI Index, resulting in an increase in O&M costs. The monitoring costs were updated from 2008 values to 2020 values using the CEPCI Index and Bureau of Labor Statistics data, resulting in an increase in monitoring costs.

Courtney Kerwin,

Director, Regulatory Support Division.

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OAR-2021-0090; FRL-9515-01-OMS]

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Flexible Polyurethane Foam Product (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), NESHAP for Flexible Polyurethane Foam Product (EPA ICR Number 1783.11, OMB Control Number 2060-0357), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through March 31, 2022. Public comments were previously requested, via the **Federal Register**, on April 13, 2021 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before February 28, 2022.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OAR-2021-0090, online using

www.regulations.gov (our preferred method) or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

SUPPLEMENTARY INFORMATION:

Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at <https://www.regulations.gov>, or in person, at the EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Flexible Polyurethane Foam Product (40 CFR part 63, subpart III) apply to owners or operators of both new and existing facilities that engage in the manufacture of flexible polyurethane foam products which emit hazardous air pollutants (HAPs). This includes facilities making slabstock flexible polyurethane foam (slabstock foam), rebond flexible polyurethane foam (rebond foam), and/or molded flexible polyurethane foam (molded foam). In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. Owners or operators of flexible polyurethane foam production

facilities to which this rule is applicable must choose one of the compliance options described in these standards or reduce HAP emissions to below the compliance level. Specifically, the rule requirements for slabstock foam producers include an initial notification, notification of compliance status, semiannual reports and annual compliance certifications. The rule requirements for molded and rebond foam producers include a notification of compliance status report and an annual compliance certification. These notifications, reports, and records are essential in determining compliance with 40 CFR part 63, subpart III.

Form Numbers: None.

Respondents/affected entities:

Slabstock foam and molded and rebond foam producers.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart III).

Estimated number of respondents: 12 (total).

Frequency of response: Semiannually and annually.

Total estimated burden: 869 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$102,000 (per year), which includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated to change over the next three years; and the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Since there are no changes in the regulatory requirements and there is no significant industry growth, there are also no changes in the capital/startup or operation and maintenance (O&M) costs.

Courtney Kerwin,

Director, Regulatory Support Division.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Chromium Emissions from Hard and Decorative Chromium Electroplating and Chromium Anodizing Tanks (40 CFR part 63, subpart N) apply to both existing and new facilities that emit chromium compounds from hard chromium electroplating, decorative chromium electroplating, and chromium anodizing tanks at major and area sources. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance with 40 CFR part 63, subpart N.

Form Numbers: None.

Respondents/affected entities:

Owners and operators of chromium electroplating and anodizing facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart N).

Estimated number of respondents: 1,343 (total).

Frequency of response: Initially, annually, semiannually, and quarterly.

Total estimated burden: 242,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).
