SUPPLEMENTARY INFORMATION:

Title: Analyzing Consumers' Value of "Product of USA" Labeling Claims.

OMB Number: 0583-XXXX.

Type of Request: Request for a new information collection.

Abstract: FSIS has been delegated the authority to exercise the functions of the Secretary (7 CFR 2.18, 2.53), as specified in the Federal Meat Inspection Act (FMIA) (21 U.S.C. 601, *et seq.*). This statute mandates that FSIS protect the public by verifying that meat products are safe, wholesome, unadulterated, and properly labeled and packaged.

The FSIS Food Standards and Labeling Policy Book (the "Policy Book") provides guidance to help meat and poultry product manufacturers prepare product labels that are truthful and not misleading. The Policy Book states that meat (beef and pork) labeling may bear the phrase "Product of USA" under one of the following conditions:

- (1) if the country to which the product is exported requires this phrase, and the product is processed in the United States or
- (2) if the product is processed in the United States (*i.e.*, is of domestic origin).

Accordingly, the "Product of USA" labeling claim may be applied to meat products derived from animals that have been imported from a foreign country but slaughtered in the United States, as well as to meat products that have been imported from a foreign country and repackaged or otherwise further processed in the United States.

USDA has received three petitions from industry associations regarding the origin of meat products bearing the "Product of USA" labeling claim, requesting that the meaning of the claim be publicly revised by USDA. Additionally, in August 2021, bills were introduced in the House of Representatives and the Senate to require that cattle be born, raised, and slaughtered in the United States in order to bear the "Product of USA" labeling claim. To address the concern that the "Product of USA" labeling claim may not accurately reflect consumer understanding about the origin of FSIS-regulated products, FSIS intends to initiate rulemaking after conducting a comprehensive review of the current
