2. *OMB approval number*: 3150-0032.

3. *Type of submission*: Extension.

4. *The form number, if applicable*: Not applicable.

5. *How often the collection is required or requested*: One-time or as needed.

6. *Who will be required or asked to respond*: Agreement States who have signed Section 274(b) Agreements with the NRC.

7. *The estimated number of annual responses*: 8.

8. *The estimated number of annual respondents*: 8.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request*: 190.

10. *Abstract*: The NRC regulations in 10 CFR part 150, provide certain exemptions to persons in Agreement States from the licensing requirements contained in Chapters 6, 7, and 8 of the Atomic Energy Act of 1954, as amended, and certain regulations of the Commission. The regulations in 10 CFR part 150 also define the Commission's continued regulatory authority over Agreement State activities which include byproduct, source, and special nuclear material reporting requirements related to reciprocity and enforcement. 10 CFR part 150 requires telephonic notification to the NRC when an Agreement State licensee identifies attempted theft or diversion of special nuclear material, byproduct material, and tritium. This notification must be followed by a written report either 15 or 60 days after the initial report, depending on the materials involved. If additional information is available after submission of the written report, an additional report is submitted. These reports are used to inform the Commission, staff, and other Federal agencies when special nuclear material, byproduct material, or tritium is lost or stolen.
