

which is 5 times as many requests that can be processed annually using the regular submission route.

The Programmatic Clearance applies to all NPS social science collections (e.g., questionnaires, focus groups, interviews, etc.) designed to furnish usable information to NPS managers and planners concerning visitor experiences, perceptions of services, programs, and planning efforts in areas managed by the NPS. To qualify for the NPS generic programmatic review process each information request must show clear ties to NPS management and planning needs in areas managed by the NPS or involve research that will directly benefit the NPS. The scope of the programmatic review process is limited to issues that are non-controversial or unlikely to attract significant public interest.

All collections must be reviewed by the NPS and approved by OMB before a collection is administered. At least 80% of the questions in an individual collection must be taken from the OMB approved Pool of Known Questions (PKQ). We acknowledge that the PKQ is not a comprehensive collection of all possible survey questions; therefore, we allow leeway for requestors to add park or research specific questions not in the PKQ. However, all questions must fit within the scope of the approved Topic Areas. The Social Science Program will continue to conduct necessary quality control and will submit each information collection request to OMB for expedited review before the collection is administered.

No changes to this information collection are anticipated at this time. However, the Program is submitting this as a “early renewal” and is designated

as a “revision” in the FRN. The Post-Covid increase in the of number surveys received in 2021 exhausted the burden hours required for 2022. For this reason, the Program is requesting this “early renewal” (i.e., revision) to increase respondent burden hours needed to complete survey requests scheduled for Spring/Summer 2022.
