The Notice supplements FAA Order 8100.15B, *Organization Designation Authorization (ODA) Procedures* (available at <http://drs.faa.gov>) and may be examined at https://www.faa.gov/aircraft/draft_docs/.

Comments Invited

The FAA invites interested stakeholders to submit comments on the proposed statement, as specified in the **ADDRESSES** section of this Notice. Commenters should include the subject line, “Organization Designation Authorization (ODA) Holder Interference with ODA Unit Members (UMs) and Communication between UMs and the Federal Aviation Administration (FAA)” on all comments submitted to the FAA. The most helpful comments reference a specific recommendation, explain the reason for any recommended change, and include supporting information. The FAA will consider all comments received on or before the closing date before issuing the final Notice. We are proposing to approve a local rule to regulate these emission sources under the Clean Air Act (CAA or the Act). We are taking comments on this proposal and plan to follow with a final action. Elsewhere in this **Federal Register**, we are making an interim final determination to defer CAA sanctions associated with our previous disapproval action concerning the County's revision of this local rule.

I. The State's Submittal

A. What rule did the State submit?

The Arizona Department of Environmental Quality (ADEQ) submitted MCAQD Rule 322 “Power Plant Operations” as amended on June 23, 2021, and submitted to the EPA on June 24, 2021. On September 25, 2021, the EPA determined that the submittal for MCAQD Rule 322 met the completeness criteria in 40 CFR part 51 appendix V, which must be met before formal EPA review.

B. Are there other versions of this rule?

We approved a previous version of Rule 322 (locally revised on October 17, 2007) into the Arizona SIP on October 14, 2009 (74 FR 52693). The County adopted revisions to the SIP-approved version on November 2, 2016, and ADEQ submitted them to us on June 22, 2017. The EPA disapproved that revision in a final rule published on July 20, 2020 (85 FR 43692). If we take final action to approve the June 23, 2021 version of Rule 322, this version will replace the previously approved version of this rule in the SIP.

C. What is the purpose of Rule 322?

Emissions of NO_x contribute to the production of ground-level ozone, smog and PM, which harm human health and the environment. Emissions of PM, including PM equal to or less than 2.5 microns in diameter (PM_{2.5}) and PM equal to or less than 10 microns in diameter (PM₁₀), contribute to effects that are harmful to human health and the environment, including premature mortality, aggravation of respiratory and cardiovascular disease, decreased lung function, visibility impairment, and damage to vegetation and ecosystems. Section 110(a) of the CAA requires states to submit regulations that control NO_x and PM emissions. Rule 322 regulates equipment at power plants that emit these and other pollutants. The EPA's technical support document (TSD) has more information about this rule.

II. The EPA's Evaluation and Action

A. How is the EPA evaluating the rule?

Rules in the SIP must be enforceable (see CAA section 110(a)(2)), must not interfere with applicable requirements concerning attainment and reasonable further progress or other CAA requirements (see CAA section 110(l)), and must not modify certain SIP control requirements in nonattainment areas without ensuring equivalent or greater emissions reductions (see CAA section 193).

Generally, SIP rules must require reasonably available control technology (RACT) for each major source of NO_x in ozone nonattainment areas classified as Moderate or above (see CAA sections 182(b)(2) and 182(f)). The MCAQD regulates a portion of the Phoenix-Mesa ozone nonattainment area which is classified as Moderate for the 2008 8-hour ozone national ambient air quality standard (40 CFR 81.303). Maricopa County's “Analysis of Reasonably Available Control Technology For The 2008 8-Hour Ozone National Ambient Air Quality Standard (NAAQS) State Implementation Plan (RACT SIP),” adopted December 5, 2016, submitted June 22, 2017 (the “2016 RACT SIP”), found that there were major sources of NO_x within the Maricopa County portion of the Phoenix-Mesa ozone nonattainment area subject to Rule 322. Accordingly, this rule must establish RACT levels of control for applicable major sources of NO_x.

The EPA's previous rulemaking on the 2017 version of Rule 322 found several deficiencies that did not allow for approval of that revision into the Arizona SIP. These deficiencies
