Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Printing, Coating and Dyeing of Fabrics and Other Textiles apply to each existing, new, or reconstructed source involved in printing, coating, slashing, dyeing or finishing of fabric and other textiles. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance with 40 CFR part 63, subpart OOOO.

Form Numbers: 5900-530.

Respondents/affected entities:

Printing, coating, slashing, dyeing, or finishing of fabric and other textiles facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart OOOO).

Estimated number of respondents: 44 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 7,080 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$960,000 (per year), which includes \$123,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the estimates: There is an increase in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to three considerations. This ICR incorporates the incremental burden from the 2019 RTR amendment (ICR No. 2071.09) into the total cost of the rule. The regulations were revised in the 2019 RTR amendment adding a requirement to periodically test add-on control devices, resulting in an increase in capital/startup costs for this testing, as well as for increased labor burden for conducting the tests, submitting reports, and keeping records. An additional

facility that is subject to this subpart was identified in a search of EPA's ECHO database. This facility became subject to this subpart after the 2019 RTR; therefore, the respondent counts in this ICR renewal are updated to include this facility.
