

Note #2 The Irrigation Project Pumps rate has two components. The first rate component is SCIP/PD's direct cost of transmission, distribution, and administration; this is proposed to be \$0.03183 per kilowatt-hour. The second rate component is SCIP/PD's direct cost of purchased power; this is \$.02611 per kilowatt-hour. We are required to use our least expensive source of power available, which is currently our Parker-Davis Project power supply. The Parker-Davis Project power rate is established annually by Western Area Power Administration.

Consultation and Coordination With Tribal Governments (Executive Order 13175)

The Department of the Interior strives to strengthen its government-to-government relationship with Indian Tribes through a commitment to consultation with Indian Tribes and recognition of their right to self-governance and Tribal sovereignty. We have evaluated this notice under the Department's consultation policy and under the criteria of Executive Order 13175 and have determined there to be substantial direct effects on federally recognized Tribes because the electric power utilities are located on or associated with Indian reservations. To fulfill its consultation responsibility to Tribes and Tribal organizations, BIA communicates, coordinates, and consults on a continuing basis with these entities on issues of electric power delivery, electric power availability, and costs of administration, operation, maintenance, and rehabilitation of our utilities that concern them. This is accomplished at the individual power utility by utility, agency, and regional representatives, as appropriate, in accordance with local protocol and procedures. This notice is one component of our overall coordination and consultation process to provide notice to, and request comments from, these entities when we adjust electric power rates.
