The National Industrial Security System (NISS) is the primary collection instrument for DCSA oversight of the NISP and maintaining data associated with cleared facilities and their oversight. The NISS is the repository of records related to the maintenance of information pertaining to contractor facility security clearances (FCL) and contractor capabilities to protect classified information in its possession. The information is utilized to determine if a company and its key management personnel are eligible for issuance of a facility clearance in accordance with 32 CFR part 117 requirements. In addition, information

is utilized to inform Government Contracting Activities of contractor’s ability to maintain facility clearance status and/or storage capability as well as to analyze vulnerabilities identified within security programs and ensure proper mitigation actions are taken to preclude unauthorized disclosure of classified information. As part of the FCL process, contractors must also complete and maintain a DCSA Form 147 in NISS. The form provides a single document to record the numerous characteristics of Open Storage Areas that are required to be reviewed for contractor facilities to be approved by DCSA for classified storage.
