

ETF options order flow. For the month of November 2021, BOX had a market share of approximately 5.58% of executed multiply-listed equity options²⁶ and BOX believes that the ever-shifting market share among exchanges from month to month demonstrates that market participants can discontinue or reduce use of certain categories of products, or shift order flow, in response to fee changes. In such an environment, BOX must continually adjust its fees and fee waivers to remain competitive with other exchanges and to attract order flow to the facility.

Finally, the Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues. In such an environment, the Exchange must continually review, and consider adjusting, its fees and credits to remain competitive with other exchanges. For the reasons described above, the Exchange believes that the proposed rule change reflects this competitive environment.
