SUPPLEMENTARY INFORMATION: Interested parties are invited to send comments regarding any aspect of this information collection, including: (1) The necessity and utility of the information collection for the proper performance of the functions of the FTA; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the collected information; and (4) ways to minimize the collection burden without reducing the quality of the collected information. Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection.

Title: Public Transportation Safety Certification Training Program (PTSCPT) (OMB Number: 2132-0578)

Background: FTA's Public Transportation Safety Certification Training Program (PTSCPT) is authorized pursuant to 49 U.S.C. 5329(c)(1), which requires the Secretary of Transportation to establish a public transportation safety certification training program for Federal and State employees, or other designated personnel, who conduct safety audits and examinations of public transportation systems, and employees of public transportation agencies directly responsible for safety oversight. The program implements a uniform safety certification training curriculum and requirements to enhance the technical proficiency of individuals who conduct safety audits and examinations of public transportation systems operated by public transportation agencies and those who are directly responsible for safety oversight of public transportation agencies. To comply with 49 U.S.C. 5329(c)(1), these designated personnel are required to register for the PTSCPT and request an Individual Training Plan (ITP). The PTSCPT has three different ITP tracks. The different ITP tracks: (1) State Safety Oversight (SSO)—State Safety Oversight Agency (SSOA) personnel and contractors who conduct safety audits and examinations of rail transit systems; (2) Rail Transit Agency (RTA)—Rail transit agency personnel and contractors who are directly responsible for safety oversight; and (3) Bus—Bus transit agency personnel and contractors who are directly responsible for safety oversight. FTA then issues an ITP which specifies a curriculum the registrant must complete. PTSCPT participants enroll in courses specific to their curriculum. The information collected as part of this program is to ensure that SSOA and RTA recipients are complying with the prescribed training requirements by ensuring their designated personnel are receiving training that assists with enhancing technical and professional proficiency in performing safety oversight functions. FTA will use the information collected to monitor implementation and effectiveness of the PTSCPT. Certain information collected may be disseminated to recipients or FTA program managers to encourage and ensure participation by designated personnel is achieved within the prescribed 3-year certification period and maintained through refresher training. Recipients are required to self-certify compliance with 49 CFR part 672

annually. Additionally, SSOAs are required to maintain training records for their designated personnel for a five-year period. This request for renewal of an existing information collection does not reflect any changes as a result of the Bipartisan Infrastructure Law. In the event that FTA updates PTSCPT requirements, FTA will seek comment from stakeholders through the publication of a separate **Federal Register** Notice outside of the Paperwork Reduction Act process.

Respondents: State Safety Oversight Agencies and Rail Transit Agencies.

Estimated Annual Number of Respondents: 91 respondents (31 SSOAs that conduct audits and examinations of public transportation systems and 60 public RTAs with designated personnel who are directly responsible for safety oversight of their systems).

Estimated Annual Number of Responses: 1,020 responses.

Estimated Total Annual Burden: 5,118 hours.

Frequency: Annually.

Director, Office of Management Planning.

Title: Fixed Guideway Capital Investment Grants (CIG) Program Section 5309 (OMB Number: 2132-0561)

Background: The Federal Transit Administration (FTA) administers the discretionary Capital Investment Grants (CIG) grant program under 49 U.S.C. Section 5309 that provides funding for major transit capital investments including rapid rail, light rail, commuter rail, bus rapid transit, and ferries. Three types of eligible projects are outlined in law: Smaller scaled corridor-based transit capital projects known as "Small Starts"; new fixed guideway transit systems and extensions to existing fixed guideway systems known as "New Starts"; and projects to improve capacity in existing fixed guideway corridors or will be in five years, known as "Core Capacity". The CIG program has a longstanding requirement that FTA evaluate proposed projects against a prescribed set of statutory criteria at specific points during the projects' development including when they seek to enter a subsequent phase of the process or a construction grant agreement. In addition, FTA must report on its evaluations and ratings annually to Congress.

The current Federal Public Transportation Law, 49 U.S.C. 5309, has not changed the statutorily defined project justification and local financial commitment criteria that are the subject of this information collection. In addition, the statutorily required approval steps for projects seeking CIG funds have not changed. The current request for renewal of this information collection does not reflect any changes as a result of the Bipartisan Infrastructure Law (BIL). FTA will seek comment from stakeholders through the publication of a separate **Federal Register** Notice outside of the PRA process. In general, the information used by FTA for CIG project evaluation and rating should arise as a part of the normal project planning process.

Respondents: State and local government agencies, including transit agencies.

Estimated Annual Number of Respondents: 155 respondents.

Estimated Total Annual Burden: 68,840 hours.

Frequency: Annually.
