General Services Administration Acquisition Regulation (GSAR); Order Level Material Clarifications

AGENCY: Office of Acquisition Policy, General Services Administration (GSA).

ACTION: Final rule.

SUMMARY: The General Services Administration (GSA) is issuing a final rule amending the General Services Administration Acquisition Regulation (GSAR) to remove unnecessary language regarding approvals and travel and to correct citation and acronym references relating to order level materials.

DATES: *Effective:* April 1, 2022.

FOR FURTHER INFORMATION CONTACT: Ms. Megan Huppee or Mr. Bryon Boyer, GSA Acquisition Policy Division, for clarification of content at gsarpolicy@gsa.gov. For information pertaining to status or publication schedules, contact the Regulatory Secretariat at 202-501-4755. Please cite GSAR Case 2020-G537.

SUPPLEMENTARY INFORMATION:

I. Background

Order Level Materials (OLMs) are supplies and/or services acquired in direct support of an individual task or delivery order placed against a Federal Supply Schedule (FSS) contract or FSS blanket purchase agreement (BPA), when the supplies and/or services are not known at the time of FSS contract

or FSS BPA award. OLMs must be acquired following the procedures in GSAR subpart 538.72. OLMs are currently approved for 59 subcategories under FSS contracts, see <https://www.gsa.gov/olm>. The GSAR currently requires the Senior Procurement Executive's (SPE) authorization for further use of OLMs under FSS. GSA is removing this requirement from the GSAR to provide revised internal operating guidance in the non-regulatory GSA Acquisition Manual (GSAM).

GSA is removing references from the OLM clause at 552.238-115 to the Federal Travel Regulation (FTR) because those references unnecessarily conflate travel as being an order level material and complicate the procedures for ordering activities and contracting officers.

GSA is also updating the GSAR to accurately reflect terminology, acronyms, citations, and references in conformance with the new consolidated FSS schedule procedures (more information available at: <https://www.gsa.gov/schedule>).

II. Authority for This Rulemaking

Title 40 of the United States Code (U.S.C.) Section 121 authorizes GSA to issue regulations, including the GSAR, to control the relationship between GSA and contractors.

III. Discussion and Analysis

After an internal review of existing policy, GSA is removing the requirement for GSA SPE authorization for use of OLMs on FSS, because it is unnecessary and administratively burdensome to the agency. Revised operating guidance which will provide for a lower level of approval, will now be provided in the non-regulatory GSAM, because these are internal procedures only, and as a result references to changes to OLM procedures are removed from the GSAR.

GSAR clause 552.238-115, Special Ordering Procedures for the Acquisition of Order-Level Materials prescribes procedures for including OLMs when placing an order against an FSS contract or FSS BPA and references travel. The reference to travel in the clause, implying that it is an OLM, has caused confusion for contracting officers. To simplify acquisition procedures, this final rule removes travel from the OLM clause to allow ordering activities and contractors to include travel at the order level in accordance with Federal Acquisition Regulations Part 31 and may also include requirements from the FTR.

IV. Executive Order 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has been reviewed and determined by OMB not to be a significant regulatory action and, therefore, was not subject to review under section 6(b) of E.O. 12866, Regulatory Planning and Review, dated September 30, 1993.

V. Congressional Review Act

OIRA has determined that this rule is not a major rule under 5 U.S.C. 804(2). Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996 (codified at 5 U.S.C. 801-808), also known as the Congressional Review Act or CRA, generally provides that before a "major rule" may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The General Services Administration will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States. A major rule under the CRA cannot take effect until 60 days after it is published in the **Federal Register**.

VI. Notice for Public Comment

The statute that applies to the publication of the GSAR is the Office of Federal Procurement Policy statute (codified at title 41 of the United States Code). Specifically, 41 U.S.C. 1707(a)(1) requires that a procurement policy, regulation, procedure or form (including an amendment or modification thereof) must be published for public comment if it relates to the expenditure of appropriated funds, and has either a significant effect beyond the internal operating procedures of the agency issuing the policy, regulation, procedure, or form, or has a significant cost or administrative impact on contractors or offerors. This rule is not required to be published for public comment, because it does not have a significant effect or impose any new requirements on contractors or offers, the rule merely corrects citation

references, removes confusing references for travel, and removes inconsistent language for authorizations for OLMs.

VII. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 et seq.) does not apply to this rule, because an opportunity for public comment is not required to be given for this rule under 41 U.S.C. 1707(a)(1) (see Section VI. of this preamble). Accordingly, no regulatory flexibility analysis is required and none has been prepared.

VIII. Paperwork Reduction Act

The final rule does not contain any information collection requirements that require the approval of the Office of Management and Budget under the Paperwork Reduction Act (44 U.S.C. chapter 35).

Taking of Marine Mammals Incidental to Commercial Fishing Operations; Atlantic Large Whale Take Reduction Plan Regulations

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; emergency final rule.

SUMMARY: NMFS is implementing a temporary emergency rule to prohibit trap/pot fishery buoy lines between Federal and State waters within the Massachusetts Restricted Area during the month of April 2022 to reduce the incidental mortality and serious injury to North Atlantic right whales (Eubalaena glacialis) in commercial lobster and Jonah crab trap/pot fisheries. This emergency rule is necessary to reduce the risk of right whale mortality and serious injury in buoy lines in an area with a high co-occurrence of whales and buoy lines.

DATES: Effective April 1, 2022, through April 30, 2022.

ADDRESSES: Copies of the documents associated with this emergency rule are available at https://www.fisheries.noaa.gov/alwtrp or by emailing Marisa Trego at marisa.trego@noaa.gov.

SUPPLEMENTARY INFORMATION:

Background

The North Atlantic right whale (Eubalaena glacialis, hereafter referred to as right whale) population has been in decline since 2010, with the most recent published estimate of right whale population size in 2019 at 368 whales (±11) with a strong male bias (Pace et al. 2017, Pace 2021). Preliminary 2020 and 2021 data suggest the decline has continued and that fewer than 350 individuals remain (Pettis et al. 2022). Though this population estimate is not final and still undergoing final peer review, it relies upon the same peer-reviewed population models used in
