

in capital improvements to the property or a reduction of rents, will be considered for eligibility of a reduced fee. Existing 538 GRRHP loans that are refinanced or modified, solely as part of an interest rate reduction, will not be eligible for reduced annual fees. The three categories that will receive a greater reduction in the fees are detailed as follows:

1. Workforce Housing: Workforce Housing is defined as housing affordable to households earning between 60 and 120 percent of area median income (AMI). By statute, the income in the 538 program is capped at 115 percent AMI. Properties with 100 percent of the units affordable to households at 80 percent–115 percent AMI will be eligible for the reduced fee.
2. Preservation of Existing Section 515, 514/516 Rural Development Properties.
3. Green and Energy Efficient Fee Structure: Upon submission of the application for existing properties that meet the requirement of the Green/Energy Efficient

fee structure, the lender must collect from the borrower and submit to the Agency evidence that the specified, independent green building standard has been achieved. Owners may access the United States Environmental Protection Agency’s ENERGY STAR Portfolio Manager software at no cost. Evidence will be in the form of a copy of the Portfolio Manager’s report showing that the building performance is at or above 75 on the 1–100 ENERGY STAR score in Portfolio Manager. For new construction and substantial rehabilitation or renovations, the lender and owner must certify that it will pursue and achieve an industry recognized standard for green building. That evidence must be submitted no more than 15 months after completion of construction or 15 months after break-even occupancy when those standards have been achieved. If these standards are not achieved, the Agency may impose protocols or restrictions to ensure the property is brought into compliance.

Acceptable, independently verified standards include the Enterprise Green Communities Criteria; U.S. Green Building Council’s LEED–H, LEED–H Midrise, LEED–

NC, or LEED for Existing Buildings: Operations & Maintenance; ENERGY STAR certification; EarthCraft House; EarthCraft Multifamily; Earth Advantage New Homes; Greenpoint Rated New Home; Greenpoint Rated Existing Home (Whole House or Whole Building label); the National Green Building Standard (NGBS); Passive Building Certification or EnerPHit Retrofits certification from the Passive House Institute US (PHIUS), International Passive House Association, or the Passive House Institute; and Living Building Challenge Certification from the International Living Future Institute, or other industry-recognized green building standards, in the sole discretion of Rural Development, Multi-Family Housing. These programs evolve and newer versions are published, sometimes annually. Projects must participate in the current version of the programs and must consult with the program provider for the most current, applicable and available programs for their project location.

The Agency announces the new fee structure as follows:

	Initial guarantee fee (due prior to or at closing)	Annual guarantee fee (due each year or portion of the year the guarantee remains in effect)*
	Basis points	Basis points
Amended Fee Structure	65	35
Workforce Housing—Rents between 80%–115% AMI	60	25
Preservation of Existing Section 515, 514/516 Rural Development Properties	60	25
Section 538 New Construction/Substantial Rehab w/Green	60	25

* The annual guarantee fee is paid in advance. (Example: A loan that closes on December 31, 2021 will incur the annual fee for 2022).
