I. Background

The Postal Service has determined that General Privacy Act Systems of Records (SOR), USPS 100.700, Medical Records and Related Documents, should be revised to support the collection and administration of records and materials in response to potential emerging public health crises and other emergency events.

II. Rationale for Changes to USPS Privacy Act Systems of Records

The emergence of SARS-CoV-2 (COVID-19) in early 2020 identified the need for robust set of policies and practices to ensure operational continuity and employee safety amidst an emergency event, while also protecting individual privacy. To support this endeavor, this SOR will be revised to support the collection of information related to ongoing pathogenic public health crises, including an individual's inoculation status related to an ongoing pathogenic public health crisis, as well as to collect information on positive or negative diagnostic test results related to an ongoing pathogenic public health crisis.

III. Description of the Modified System of Records

To provide for the appropriate tracking of information related to an ongoing pathogenic public health crisis, the Postal Service will revise this SOR to include two new purposes, one new category of records, and two new retention periods for that new category of records.

Pursuant to 5 U.S.C. 552a(e)(11), interested persons are invited to submit written data, views, or arguments on this proposal. A report of the proposed revisions has been sent to Congress and to the Office of Management and Budget for their evaluations. The Postal Service does not expect this amended system of records to have any adverse effect on individual privacy rights.
