

SUPPLEMENTARY INFORMATION:**Title and OMB Number**

Voting System Anomaly Reporting and Root Cause Analysis; OMB Number Pending.

Purpose

Under the PRA (44 U.S.C. 3501–3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. “Collection of information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, the EAC is publishing notice of the proposed collection of information set forth in this document.

HAVA requires that the EAC certify and decertify voting systems. Section 231(a)(1) of HAVA (52 U.S.C. 20971) specifically requires the EAC to “provide for the testing, certification, decertification and recertification of voting system hardware and software by accredited laboratories.” To meet this obligation, the EAC has created a voluntary testing and certification program to test voting systems to federal voting system standards.

The program is to publish two forms. These are to be used to collect information concerning anomalies in voting systems used in federal elections. These forms will collect initial anomaly information as reported by voting system manufacturers and election officials. Root cause analysis of the anomalies, test results and findings will also be collected. This information is collected to improve the quality of voting systems used in federal elections.

Public Comments

We are soliciting public comments to permit the EAC to:

- Evaluate whether the proposed information collection is necessary for the proper functions of the Office of Grants Management.
- Evaluate the accuracy of our estimate of burden for this proposed collection, including the validity of the methodology and assumptions used.

- Enhance the quality, utility, and clarity of the information to be collected.
- Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Please note that comments submitted in response to this Notice are public record. Before including any detailed personal information, you should be aware that your comments as submitted, including your personal information, will be available for public review.

The program is to publish two forms. An initial manufacturer registration form, and a voting system application form. These are to be used to collect information from voting system manufacturers who wish to participate in the program and the voting systems they intend to submit for testing and certification. The registration form collects information on the manufacturer ownership, contact details for certain directors and senior staff, and

the manufacturers quality processes. The voting system application collects administrative information on new or modified voting systems. This information is collected to improve the quality of voting systems used in federal elections.
