SUPPLEMENTARY INFORMATION:**Correction**

In the **Federal Register** of March 3, 2022, in FR Doc 2022–04505, on page 12082, in the table in the third column, correct the subsidy rate (percent) listed for companies covered by the R–125 CVD order to be as follows: 306.57 percent for Arkema Daikin Advanced Fluorochemicals (Changsu) Co., Ltd., Daikin Fluorochemicals (China) Co., Ltd., Hongkong Richmax Ltd., and Weitron International Refrigeration Equipment (Kunshan) Co., Ltd.; 14.66 percent for Zhejiang Quzhou Juxin Fluorine Chemical Co., Ltd.; 12.75 percent for Zhejiang Sanmei Chemical Ind. Co., Ltd.; and 14.43 percent for “All Others.”

Background

On March 3, 2022, Commerce published in the **Federal Register** the AD and CVD orders on R–125 from China.¹ We incorrectly listed the applicable subsidy rates for the companies covered by the CVD order due to a typographical error. The corrected subsidy rates are as follows:

FOR FURTHER INFORMATION CONTACT:

Courtney Smith, Ph.D., or Shasta McClenahan, Ph.D., (301) 427–8401.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222–226), and the Fur Seal Act of 1966, as amended (16 U.S.C. 1151 *et seq.*).

The proposed permit would authorize vessel surveys for continuing a long-term assessment of the health and ecology of cetaceans, with particular focus on the ESA-listed Southern Resident killer whales, and sympatric ecotypes of killer whales (*Orcinus orca*), with the primary goal of obtaining health information pertinent to their management and conservation. The core study area is the Salish Sea, covering the eastern inlet of the Strait of Juan de Fuca, Puget Sound to the south, the U.S. boundary to the north, and the mainland to the east, but includes the outer coast from Washington State to Monterey California. Research methods primarily involve fecal sampling, photographic identification, and behavioral observations, but depending on the conditions and behavior of the whales we may also use other non-invasive or benign techniques such as prey and skin sampling in the trail of whales, unmanned aircraft remote observations of fecal patches and whales, and eDNA water sampling. Parts from unidentified ESA-listed fish (e.g., salmonid) species may also be collected during predation events. Secondary target species that may be

approached include: Fin (*Balaenoptera physalus*), gray (*Eschrichtius robustus*), humpback (*Megaptera novaeangliae*), and minke (*Balaenoptera acutorostrata*) whales. Up to 21 additional cetacean species may be taken if opportunistically encountered (see permit take table). Up to 100 takes whales of each killer whale stock and up to 400 individuals of each of the other species may be taken annually. Five pinniped species may be unintentionally harassed during research activities. The permit would be for 5 years.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: March 3, 2022.
