The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. *Description of Request*: The licensee proposes to amend its exemption to replace the current turbine/generator which has completed its functional life cycle, and as part of ongoing maintenance, is scheduled for replacement in 2022. To remove the existing turbine/generator and install the new one, certain portions of the powerhouse building would need to be demolished and reconstructed to fit the new turbine/generator arrangement, including a replacement draft tube. As such, the proposed amendment would require the temporary installation of a cofferdam at the downstream toe of the dam to encompass and isolate the draft tube and tailrace. The licensee would remove ledge and rock from the existing tailrace to allow the installation of the replacement draft tube and to improve hydraulic performance of existing turbine flows.
