

emergency use of drugs and biological products during the COVID-19 pandemic under Section 564(b)(1) of the Act, 21 U.S.C. § 360bbb-3(b)(1), unless the declaration is terminated or authorization revoked sooner.

IV. Duration of Authorization

This EUA will be effective until the declaration that circumstances exist justifying the authorization of the emergency use of drugs and biological products during the COVID-19 pandemic is terminated under Section 564(b)(2) of the Act or the EUA is revoked under Section 564(g) of the Act.

Sincerely,

/s/

Jacqueline A. O'Shaughnessy, Ph.D.
Acting Chief Scientist
Food and Drug Administration

Dated: March 14, 2022.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164-01-C

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2022-N-0236]

Prioritizing the Addition of Maximum Daily Exposure Information and Removing Dosage Form Information From the Inactive Ingredient Database; Establishment of a Public Docket; Request for Comments

AGENCY: Food and Drug Administration, Department of Health and Human Services (HHS).

ACTION: Notice; establishment of a public docket; request for comments.

SUMMARY: The Food and Drug Administration (FDA, we, or Agency) is announcing the establishment of a docket to solicit comments that will assist the Agency in determining how best to prioritize the addition of maximum daily exposure (MDE) information for inactive ingredients that do not currently include MDE information in the Center for Drug Evaluation and Research's Inactive Ingredient Database (IID) and whether to restructure the IID by removing dosage form information.

DATES: Submit either electronic or written comments on the notice by June 21, 2022.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. The <https://www.regulations.gov> electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of June 21, 2022. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the

manner detailed (see "Written/Paper Submissions" and "Instructions").

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand Delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

Instructions: All submissions received must include the Docket No. FDA-2022-N-0236 for "Prioritizing the Addition of Maximum Daily Exposure Information and Removing Dosage Form Information From the Inactive Ingredient Database; Establishment of a Public Docket; Request for Comments." Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240-402-7500.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states

“THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

FOR FURTHER INFORMATION CONTACT: Susan Zuk, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 75, Rm. 6684, Silver Spring, MD 20993-0002, 240-402-9133, Susan.Zuk@fda.hhs.gov.

SUPPLEMENTARY INFORMATION:

I. Background

The IID provides information on inactive ingredients in FDA-approved drug products.¹ An inactive ingredient, or excipient, is any component of a drug product other than an active ingredient (21 CFR 210.3(b)(8) and 314.3(b)). Generally, the IID identifies excipients that appear in approved drug products for a particular dosage form and route of administration. This information in the IID has been used by all segments of industry as an aid in developing new drug products, including new generic

drug products. For example, excipients used in drug products submitted in an abbreviated new drug application are required to be safe at the levels proposed and under the conditions prescribed, recommended, or suggested in the labeling proposed for the drug (see sections 505(j)(4)(H)(i) and (ii) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(j)(4)(H)(i) and (ii))). The IID provides evidence that a particular excipient was previously permitted by FDA in specific levels, routes of administration, and dosage forms in FDA-approved products. FDA may consult the IID when performing regulatory filing reviews and technical reviews of applications as part of an evaluation of whether the proposed levels of excipients in drug product formulations are acceptable or require additional documentation to support their use.

FDA made certain enhancements to the IID in 2020 consistent with the Generic Drug User Fee Amendments (GDUFA) Reauthorization Performance Goals and Program Enhancements Fiscal Years 2018–2022 (GDUFA II commitment letter).² One of these enhancements permits users to perform electronic queries to obtain accurate maximum daily intake (MDI) and MDE information for each route of administration for which data are available. MDE is defined as the total amount of the excipient that would be taken in a day based on the maximum daily dose of the drug products in which it is used. MDE can also be referred to as MDI for oral drug products. FDA has steadily increased the number of excipient records that display MDE with each publication of the IID,³ but not all excipients in the IID have MDE information. The inclusion of such information could enhance the ability of applicants to reference IID information in support of proposed levels of excipients in their drug products. In meetings with FDA, stakeholders have asked about FDA’s plan to prioritize the addition of MDE information and have suggested that FDA focus on specific excipients that the stakeholders consider to be of high priority.

Further, some stakeholders have expressed that the numerous records in the IID for each excipient can be confusing. Each IID record includes the excipient, its route of administration, and its dosage form. An excipient search

can yield a lengthy list of dosage forms for each route of administration, which could make finding the most appropriate IID record to reference challenging. Some stakeholders have suggested that FDA could remove dosage form information from the IID to simplify searches. We believe such an approach would be consistent with the GDUFA II commitment letter, which describes upgrades to the IID to provide excipient MDE information associated with particular routes of administration. However, we recognize that some stakeholders may find the IID’s dosage form information helpful for drug product development. For example, applicants may refer to this information to confirm that FDA has approved drug products in certain dosage forms that contain an excipient at a particular level. For these applicants, removal of dosage form information from the IID could hinder their drug development program.

II. Other Issues for Consideration

FDA is considering how best to prioritize the addition of MDE information and plans to target those excipients deemed to be high priority by various stakeholders. Under such a plan, individual excipients could be designated for prioritization from those currently listed in the IID without MDE information. Alternatively, priority excipients could be designated based on a category of drug products in which they are used (e.g., excipients used in oral or topical products), and then FDA would prioritize adding MDE information for those excipients included in that category of drug products. FDA intends to develop a priority list based on feedback to this **Federal Register** notice. FDA will consider those excipients that are a high priority for multiple stakeholders and will also consider stakeholders’ rationale for inclusion of specific excipients in developing the priority list. FDA is also considering how to post information about recent updates to the IID based on efforts related to this **Federal Register** notice.

FDA intends also to explore the feasibility of modifying the IID structure to eliminate dosage form information if feedback to this **Federal Register** notice indicates that such action would benefit drug developers and other stakeholders.

Interested persons are invited to provide detailed comments on all aspects described in this notice. To facilitate this input, FDA has developed the following list of questions. These questions are not meant to be exhaustive, and FDA is also interested in other pertinent information

¹ For more information on the IID, see the draft guidance for industry entitled “Using the Inactive Ingredient Database” (July 2019). When final, this guidance will represent FDA’s current thinking on this topic. For the most recent version of a guidance, check the FDA guidance web page at <https://www.fda.gov/regulatory-information/search-fda-guidance-documents>.

² See the GDUFA II commitment letter, p.17, at <https://www.fda.gov/media/101052/download>.

³ The IID is updated on a quarterly basis at <https://www.accessdata.fda.gov/scripts/cder/iig/index.cfm>.

stakeholders would like to share on this topic. In all cases, FDA encourages stakeholders to provide the specific rationale and basis for their comments, including available supporting information.

1. Should FDA focus on adding MDE information for certain excipients? If so, which excipients should be prioritized for inclusion of MDE information and why?

2. Should FDA focus on prioritizing excipients used in certain categories of drug products (e.g., oral or topical products)? If so, which categories and which specific excipients used in those categories should be prioritized and why?

3. Is dosage form information in the IID helpful to your drug development program? If so, please explain how dosage form information in the IID is used in your drug development program.

4. Is the current structure or format of the IID difficult to navigate? If so, how can it be improved?

Dated: March 15, 2022.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2021-N-0415]

Irfanali Nisarali Momin: Final Debarment Order

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is issuing an order under the Federal Food, Drug, and Cosmetic Act (FD&C Act) debarment Irfanali Nisarali Momin for a period of 5 years from importing or offering for import any drug into the United States. FDA bases this order on a finding that Mr. Momin was convicted of one felony count under Federal law for conspiracy. The factual basis supporting Mr. Momin's conviction, as described below, is conduct relating to the importation into the United States of a drug or controlled substance. Mr. Momin was given notice of the proposed debarment and was given an opportunity to request a hearing to show why he should not be debarred. As of December 26, 2021 (30 days after receipt of the notice), Mr. Momin had not

responded. Mr. Momin's failure to respond and request a hearing constitutes a waiver of his right to a hearing concerning this matter.

DATES: This order is applicable March 22, 2022.

ADDRESSES: Submit applications for termination of debarment to the Dockets Management Staff, Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500, or at <https://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT:

Jaime Espinosa, Division of Enforcement (ELEM-4029), Office of Strategic Planning and Operational Policy, Office of Regulatory Affairs, Food and Drug Administration, 12420 Parklawn Dr., Rockville, MD 20857, 240-402-8743, or at debarments@fda.hhs.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Section 306(b)(1)(D) of the FD&C Act (21 U.S.C. 335a(b)(1)(D)) permits debarment of an individual from importing or offering for import any drug into the United States if FDA finds, as required by section 306(b)(3)(C) of the FD&C Act, that the individual has been convicted of a felony for conduct relating to the importation into the United States of any drug or controlled substance. On February 12, 2021, Mr. Momin was convicted, as defined in section 306(l)(1) of the FD&C Act, in the U.S. District Court for the District of Georgia, Rome Division, when the court entered judgment against him for the offense of conspiracy, in violation of 18 U.S.C. 371. FDA's finding that debarment is appropriate is based on the felony conviction referenced herein. The factual basis for this conviction is as follows: As contained in the information in Mr. Momin's case, filed on September 23, 2020, to which he plead guilty, between August 2014 and November 2018, Mr. Momin along with his co-conspirators, illegally imported misbranded drugs from China that he marketed for male enhancement under names such as "Black Ant King," "Bull," "Rhino 7," "Super Hard," "Herb Viagra," "Jack Rabbit," "Zhen Gongfu," "Stree Overlord," "Pro Power Max," "A Traditional Chinese Medicine-Kidney Reinforcing Pallet," "Libigrow," "Red Mamba," "Rhino 69," "Krazzy Rhino," "Rhino 25," "Hard Steel," and "Black Mamba." These products contained sildenafil, the active pharmaceutical ingredient in Pfizer, Inc.'s FDA-approved erectile dysfunction drug, VIAGRA, and/or tadalafil, the active pharmaceutical ingredient in Eli Lilly & Company's FDA-approved erectile dysfunction drug, CIALIS. Both

VIAGRA and CIALIS can be obtained in the United States only with a prescription from a practitioner licensed by law to administer such drugs pursuant to section 503(b) of the FD&C Act (21 U.S.C. 353(b)). In order to evade U.S. import restrictions, Mr. Momin illegally imported misbranded drugs into the United States from China. As per the conspiracy Mr. Momin was involved in, the U.S. Customs declarations on the boxes containing the misbranded drugs falsely declared the contents of the boxes to be something other than misbranded drugs, such as beauty products and health products, to make it appear that the boxes contained items that could legally be imported into the United States. Mr. Momin then introduced and delivered for introduction into interstate commerce these misbranded drugs containing undeclared sildenafil and tadalafil, in violation of sections 301(a), 301(c), 303(a)(2), 502(a), and 502(f) of the FD&C Act (21 U.S.C. 331(a), 331(c), 333(a)(2), 352(a) and 352(f)).

As a result of this conviction, FDA sent Mr. Momin, by certified mail, on November 19, 2021, a notice proposing to debar him for a 5-year period from importing or offering for import any drug into the United States. The proposal was based on a finding under section 306(b)(3)(C) of the FD&C Act that Mr. Momin's felony conviction under Federal law for conspiracy, in violation of 18 U.S.C. 371, was for conduct relating to the importation into the United States of any drug or controlled substance because he illegally imported and then introduced misbranded tadalafil and sildenafil into interstate commerce. In proposing a debarment period, FDA weighed the considerations set forth in section 306(c)(3) of the FD&C Act that it considered applicable to Mr. Momin's offense and concluded that the offense warranted the imposition of a 5-year period of debarment.

The proposal informed Mr. Momin of the proposed debarment and offered him an opportunity to request a hearing, providing him 30 days from the date of receipt of the letter in which to file the request, and advised him that failure to request a hearing constituted a waiver of the opportunity for a hearing and of any contentions concerning this action. Mr. Momin received the proposal and notice of opportunity for a hearing at his residence on November 26, 2021. Mr. Momin failed to request a hearing within the timeframe prescribed by regulation and has, therefore, waived his opportunity for a hearing and waived any contentions concerning his debarment (21 CFR part 12).
