[Project No. 15278–000]

**Rye Sutton Hydroelectric, LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications**

On June 6, 2022, Rye Sutton Hydroelectric, LLC, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of hydropower at the existing U.S. Army Corps of Engineers' (Corps) Sutton Dam located on the Elk River in Braxton County, West Virginia. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed Sutton Dam Hydroelectric Project would consist of the following: (1) a new 40-foot-wide, 60-foot-long powerhouse to be located downstream of the Corps dam along the southern bank; (2) a new multiple-port intake structure against the upstream face of the dam; (3) a new 12-foot-diameter, approximately 300-foot-long steel penstock; (4) two turbine-generator units with a total generating capacity of 6 megawatts; (5) a new 100-foot-wide by 300-foot-long tailrace; (6) a new substation with a step-up transformer; (7) a new 550-foot-long, 12-kilovolt transmission line; and (8) appurtenant facilities. The proposed project would

have an estimated annual generation of 24,000 megawatt-hours.
